

Green Campus of KLE Academy of Higher Education and Research

University was awarded 4th and 3rd cleanest campus by MHRD in 2017 and 2018

2017 : 4th Rank

2018 : 3rd Rank

Awarded at the hands of Hon. Minister
Mr. Prakash Javadekar

KAHER, Belagavi gets 3rd Rank in
Swachh Campus Ranking - 2018
(All India Survey of Higher Educational Institutions)
under the 'Universities (Residential) Category'
conducted by the Ministry of HRD,
Government of India

तारीख / Date:- 06-August-2021
ज्ञापनसंख्या/ Memo no: MoE/Swachhta Action Plan/2020-21/August 21/035/046

District Green Champion Certificate

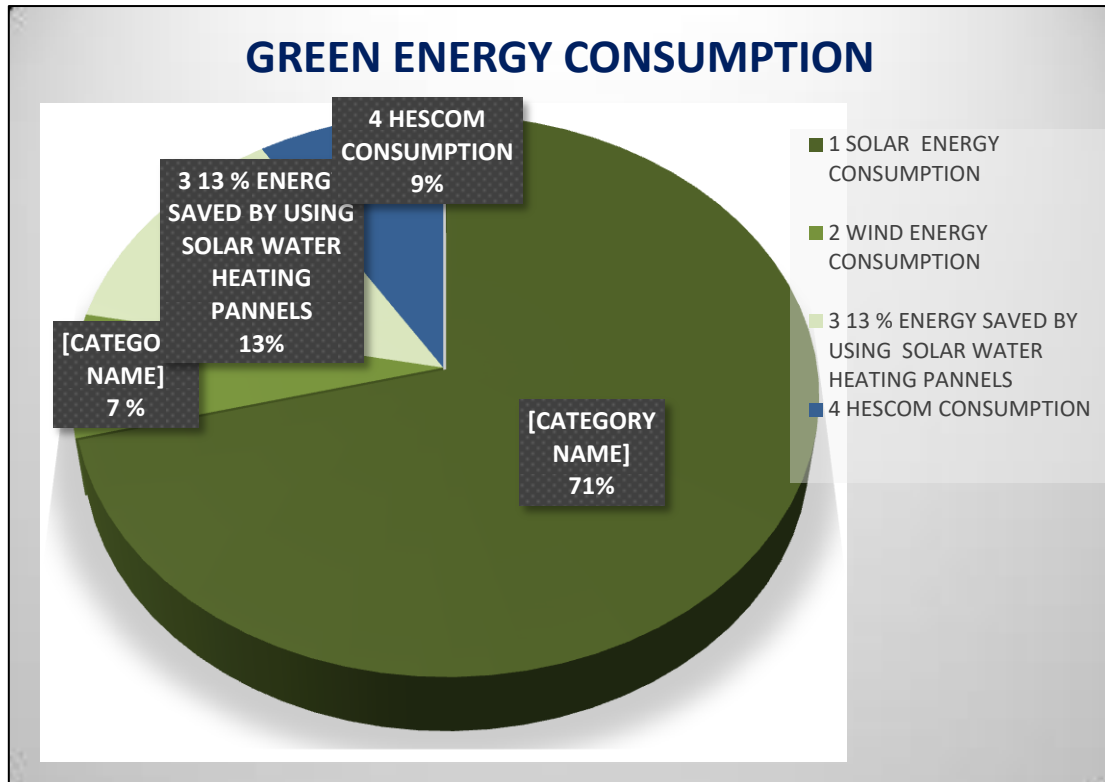

This is to certify that KLE Academy of Higher Education and Research, is hereby recognized as **District Green Champion** for Belagavi District Karnataka State for the Academic Year 2020-21. The Institution has successfully set up the Swachhta Action Plan Committee, adopted and implemented best practices in the areas of Sanitation, Hygiene, Waste Management, Water Management, Energy Management and Greenery Management.

This certificate is awarded in the presence of,
Shri M.G. Hiremath, I.A.S. Deputy Commissioner, Belagavi, Karnataka

August 2021

District Level Award

Dr W G Prasanna Kumar
Chairman
MGNCRE, Ministry of Education
Government of India

AVERAGE ENERGY REQUIREMENT PER MONTH		
SL NO	CONSUMPTION	UNITS
1	J N Medical College Consumption	3,00,000
2	KLE Hospital Consumption	9,00,000
3	Hot Water	1,46,550
	Total	13,46,550

ENERGY UTILIZATION FROM DIFFERENT SOURCES PER MONTH			
SL NO	CONSUMPTION	UNITS	PERCENTAGE
1	Solar Energy Consumption	850000	61%
2	Wind Energy Consumption	200000	14%
3	Solar Pannels for Hot Water	146550	11%
4	HESCOM Consumption	200000	14%
5	Overall Consumption	1396550	100%
6	Solar Water Heating Pannels	977 No's	

SII Certificates
The Green Institutional Rankings 2022 & 2023

WASTE MANAGEMENT AND ENERGY CONSERVATION

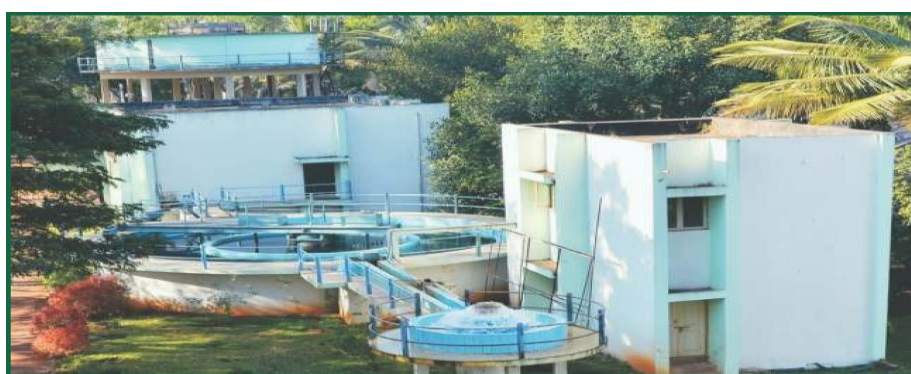

The KLE Academy of Higher Education and Research, Deemed-to-be-University, Belagavi, Karnataka has 10 constituent units under its ambit which include five off-campus centres two at Belagavi, two at Hubballi and one at Bengaluru.

Five constituent colleges are housed in a 110 acres sprawling, beautiful, clean and green campus. All the buildings are an example of modern architecture, its convention centre with four auditoriums is comparable to best anywhere in the world. The University provides excellent facilities for extra-curricular and co-curricular activities in the form of huge amphitheatre, olympic size swimming pool, modern gymnasium, wood floored badminton courts, sports arena, stadium, tennis courts, etc. The campus is well-maintained with lot of greenery. The University garden is a wonderful relaxing place with water bodies and musical fountain.

The infrastructure and facilities for waste management and energy conservation are given below:

WATER TREATMENT PLANT

In order to meet huge requirements of water for drinking and domestic purposes, water treatment plant is set up in the campus. The raw water is treated in this plant and then supplied to the campus. The capacity of the plant is 22.50 lakh LPD. The main sources of water are Hidkal Water Reservoir, Community water harvest source from Lingaraj Campus well, Kangrali B.K. well, in addition to borewell in the campus. Only after testing the water on daily basis, water is supplied for use. Water

treatment is necessary to maintain pH & other parameters as per IS specifications for potability and good health of consumers. 24x7 water supply is ensured in the campus

Rainwater Harvesting

Rainwater harvesting is an innovative technique adopted to harvest the rainwater from roofs. The campus soil strata is 4'-0" below containing impervious and rocky. Hence, the excess rainwater of the campus overflows and collected at lower portion at Kangrali B. K. campus which in turn is collected at open well. The rain water from roof top of the campus buildings is collected in storage tanks, and will be reutilized for gardening and other non-drinking purposes. This technique will help to increase the ground water level and to recharge the bore wells. Rain water harvesting also reduces the soil erosion and pollution of water bodies.

Ecological Benefits:

The ecological benefits of rainwater harvesting are immense. The collected rainwater can be used for various purposes in and around the campus. This includes domestic and gardening and

Borewell Recharge Units

Borewell Recharge Units

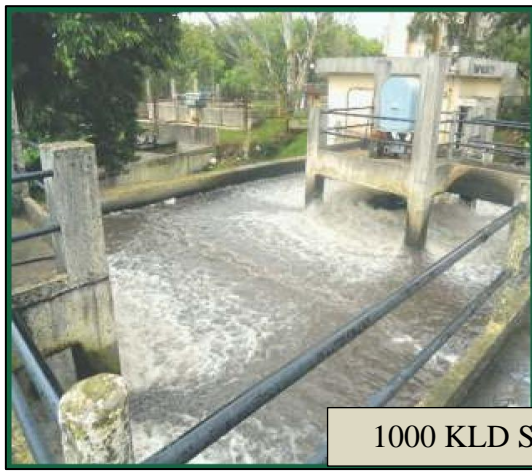

Rainwater Pipeline connecting to Water Storage Tanks

SEWAGE TREATMENT PLANT

The main objective of establishment of Sewage Treatment Plant (STP) is to recycle the waste water and reutilize the same for non-drinking purposes. The waste water generated from the Colleges, Hostels and Staff quarters is let into the campus STP. There are two STP plants of 2000 KLD i.e.1000 KLD each (In College Campus and Hospital campus). The STP is operated by skilled technical staff and also testing of recycled water is done at regular intervals to ensure quality of the water, as per the Pollution Control Board norms. The analysis report of the treated waste water the water is sent to KSPCB monthly. The treated waste water is used for Campus gardening and toilet flushing purposes. The output of recycled water is 2.25 lakh LPD. During the rainy season, the excess treated waste water let out in the municipal UGD and RWH pits.

1000 KLD STP in Hospital Campus

1000 KLD STP in College Campus

STP treated waste water is used for gardening in campus

BIO - DIGESTER TOILETS

Bio-digester technology is a unique innovation in the world of sanitation. It consists of a Bio- toilet attached with bio-digester tanks, where the human faecal matter gets 100% degraded and gets converted into reusable water & bio-gas. The Water is used for watering the plants

Incinerator For Bio-medical Waste Treatment

The Bio-medical waste generated from the Hospital will be collected in closed container trolleys, segregated on site as per the standard norms and disposed in Double Chambered Incinerator Plant, Primary Chamber temperature 800°-850°C and Secondary chamber temperature 1000°- 1100°C. The Capacity of Incinerator is 150° Kg/ hour. Having plastic and paper shredders of capacity 50 kg per hour and 20 kg per hour respectively, used for shredding and waste generated is sent for authorized recyclers. “**The Unique feature of incinerator plant is heat recovery unit in flue gas path**” “which recovers flue gas heat and generate hot water 2000ltrs per hour which is used for boiler feed water, which **reduces fuel consumption 5000ltrs per month, approximately.**

Steps in the management of hospital waste include

Generation, Segregation / separation, Collection, Transportation, storage Treatment, Final disposal

General Waste : Paper waste, hard boards, cartons, kitchen waste:

- White bin/White bag
- **Treatment:** Sending to authorized vendor

Kitchen waste sent to vermicompost unit / municipality

Infectious waste : Body parts, placenta, human tissue, surgical waste, cotton, bandages, dressings, solid plaster, beddings, pads, Gauge etc...

- Yellow bin/Yellow bag
- **Treatment :** Incineration

Infectious and non infectious plastic waste: IV Bottles, IV Tubes, Catheters, syringes, gloves, Ryles tube Red bin/Red bag

Treatment: Shredding & Sending to authorized vendor

Sharps : Puncture proof container, Transparent container

- **Treatment:** Incineration

Glass waste (Ample ,vials and other glass materials)

- Blue bin/Blue Bag
- **Treatment:** Sending to authorized vendor

VERMICOMPOST

Eco-friendly Waste Management Through Vermicomposting:

There are two Vermicompost units installed in University campus and in Ayurveda College campus. The waste generated like dried leaves, garden trimmings, trimmed lawns, etc. in the JNMC campus (Hostel, Garden) are effectively recycled and reutilized by using vermicomposting techniques and converted into quality vermicompost and vermiwash. Two promising worms namely *Eudriluseugeniae* and *Eiseniafoetida* are used for vermicompost production.

The total annual production from both the compost units is 20,190 kg and the vermicompost generated is utilized for campus gardening.

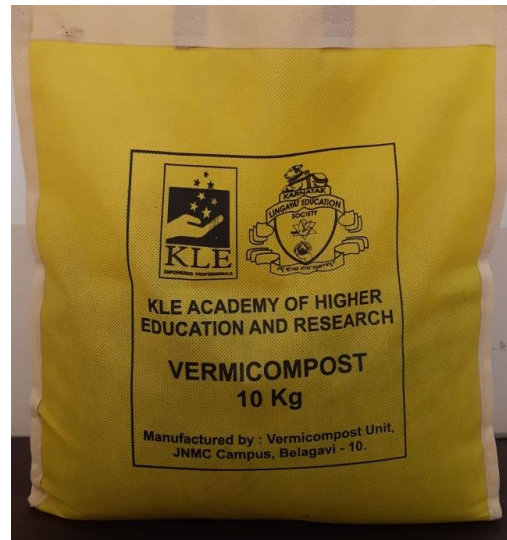

Benefits:

- Vermicompost enhances the growth of the plants and suppresses the diseases in the plants.
- It improves soil structure, texture, porosity and water holding capacity.
- It helps to neutralize the pH of the soil.
- Vermicompost enhances the soil and microbial activity.
- It contains several micro and macro nutrients, vitamins, enzymes and hormones like auxins and gibberellins.

Vermi compost pits have been set up in the campus for Biodegradable waste

VERMIWASH

Vermiwash is a brown colored liquid fertilizer. It contains large amount of macro and micronutrients, Plant hormones and ensure healthy development of crops. It is mainly used as a foliar spray for crops.

Vermi wash Unit Compost

Vermi wash Tank

Solid Waste:

The solid waste generated is collected door to door and segregated at source as Bio- Degradable & Non-Bio degradable waste. The Bio-degradable waste is converted into Compost in our on-site Vermi Compost unit and the converted manure is used in our gardens. The Non-Bio degradable waste is segregated into Recyclable & Non-Recyclable waste. The Recyclable waste is handed over to Authorized waste recycler. The Non-Recyclable Non- Biodegradable waste is sent to our Hospital Incinerator. The wet waste like shredded leaves, kitchen waste, hostel food waste is collected door to door and sent for decomposition in our on-site Vermi compost unit for production of manure.

Liquid waste

Liquid Bio-Medical waste is disinfected with 1% of hypochlorite solution. Stationary liquid waste disinfection units are provided at outlet of laboratories in the campus as per the water Act of KSPCB. Treated out let Bio-medical Liquid waste is connected to STP for further treatment.

Bee - Keeping:

Bees are one of the main insects in the world that can produce honey that is beneficial to all of us. We obtain honey from these bee keeping units. Honey is an important food for human beings. Since ancient times, honey is used for treating several diseases and it is an antioxidant. Therefore, bee-keeping is an important activity undertaken at the campus and the honey produced at various units is provided to staff of KAHER.

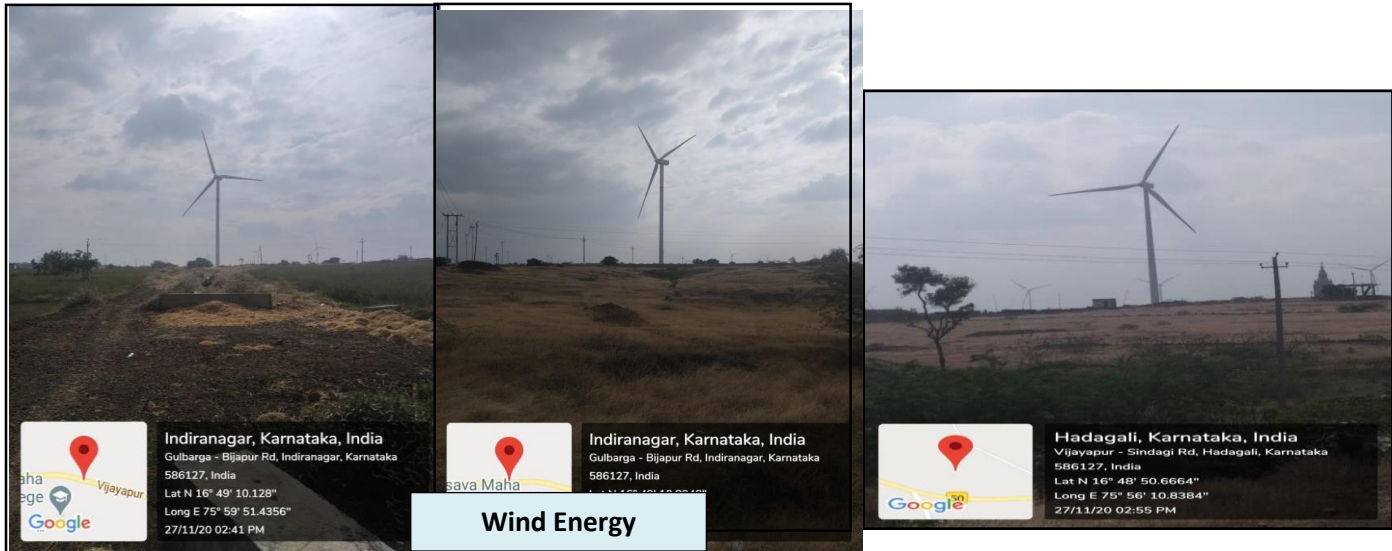

Importance of Bee-keeping:

1. Plays an excellent role in pollination. Honey bees are the best pollinating agents which help in increasing the yield of several crops.
2. Provides honey which is the most valuable nutritional food.
3. Provides bee wax which is used in many industries including cosmetic industries, polishing industries, pharmaceutical industries, etc.

Facilities in the campus for alternate source of energy: solar energy

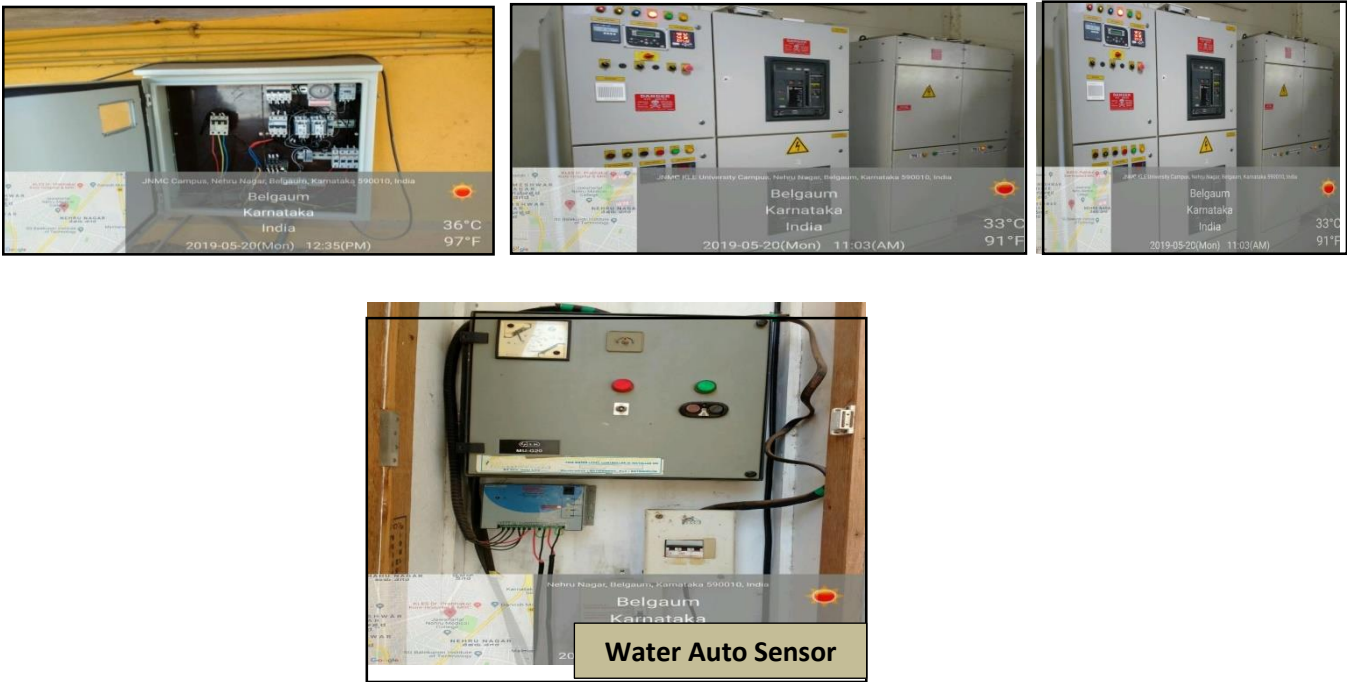

Wheeling to the Grid

WHEELING FROM 500 MW WIND POWER PLANT AT VIJAYPUR

Sensor-based energy conservation

BIOGAS PLANT

Use of LED bulbs / power efficient equipment

RENEWABLE ENERGY

In order to reduce dependency on HESCOM (Hubbli Electricity Supply Company), to conserve energy, to reduce carbon footprint and to encourage renewable energy usage, compus has got a electrical supply from (i) Wheeling (transportation of electrical energy) from solar power plant situated at Albala village Jamkhandi Taluka, Vijayapur Districts wind power plant at Vijaypur. Solar water heating panels are also provided on staff quarters, hostel roof tops, college building top (work under progress). With alternate source of energy, the dependancy on HESCOM has been reduced by 86%.

Green Energy Heating Pannels (Hostels & Quarters)

Battery Vehicles:

The campus is vehicle free zone. For transportation within the campus, electrical battery vehicles are provided for the staff and students.

SANITARY NAPKIN DISPOSER

Sanitary Napkin Disposers (Incinerator) are fixed in Girls Hostels and the menial staff collect napkins and dispose the same in the incinerator. Sanitary napkin incinerator is used for instant disposal of used napkins. It is specially designed to destroy used napkins. It is the best solution for destroying sanitary napkin and converting it to ash.

Toilet Facility for Differently abled persons:

Toilet facilities are provided at Colleges and Hostels as per the norms. Ramp with railing facility and special provision for parking the vehicles is also provided with demarcation.

ENERGY AUDIT COMPLETION CERTIFICATE

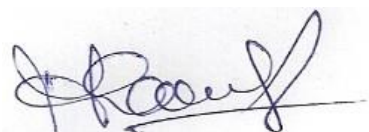

I, Mallikarjun A Kambalyal, endorse and confirm that the Energy Audit for the KLE's Jawaharlal Nehru Medical College Belagavi has been carried out on 5th to 8th Dec 2022 under the instructions of Registrar, KAHER, Belagavi, KARNATAKA

This report is generated based on the site visits and evidence collected from the site and this completion certificate is issued in compliance with *Criteria 7.1.6*.

All attempts have been made to evaluate the scope for development and inculcate green practices in the campus and extended throughout the campus. The focus is also laid to make positive impact on the society for a better living.

This report is tabled in two parts. The first forms the core discussions which are subject specific under the statutory requirements of the NAAC accreditation norms. The second section is geographical conditions impacting the performance of the audit objectives.

Any modifications, changes, omissions after the site visit shall be exclusive.

TERMS AND CONDITIONS OF AUTHORISATION

1. The applicant shall comply with the provisions of the Environment (Protection) Act, 1986 and the rules made there under.
2. The authorisation or its renewal shall be produced for inspection at the request of an officer authorised by the prescribed authority.
3. The person authorized shall not rent, lend, sell, transfer or otherwise transport the biomedical wastes without obtaining prior permission of the prescribed authority.
4. Any unauthorised change in personnel, equipment or working conditions as mentioned in the application by the person authorised shall constitute a breach of his authorisation.
5. It is the duty of the authorised person to take prior permission of the prescribed authority to close down the facility and such other terms and conditions may be stipulated by the prescribed authority.
6. Applicant shall take all necessary steps to ensure that bio-medical waste is handled without any adverse effect to human health and the environment and in accordance with these rules.
7. Applicant shall make a provision within the premises for a safe, ventilated and secured location for storage of segregated biomedical waste in colored bags or containers in the manner as specified in Schedule I of the Bio-Medical Waste Management Rules, 2016.
8. Applicant shall ensure that there shall be no secondary handling, pilferage of recyclables or inadvertent scattering or spillage by animals and the bio-medical waste from such place or premises shall be directly transported in the manner as prescribed in these rules to the common bio-medical waste treatment facility or for the appropriate treatment and disposal, as the case may be, in the manner as prescribed in Schedule I the Bio-Medical Waste Management Rules, 2016.
9. Applicant shall pre-treat the laboratory waste, microbiological waste, blood samples and blood bags through disinfection or sterilisation on-site in the manner as prescribed by the World Health Organisation (WHO) or National AIDs Control Organisation (NACO) guidelines and then sent to the common bio-medical waste treatment facility for final disposal;
10. Applicant shall phase out use of chlorinated plastic bags, gloves and blood bags within two years from the date of notification of these rules;
11. Applicant shall dispose solid waste other than bio-medical waste in accordance with the provisions of respective waste management rules made under the relevant laws and amended from time to time;
12. Applicant shall not to give treated bio-medical waste with municipal solid waste;
13. Applicant shall provide training to all its health care workers and others, involved in handling of bio medical waste at the time of induction and thereafter at least once every year and the details of training programmes conducted, number of personnel trained and number of personnel not undergone any training shall be provided in the Annual Report;

SENIOR ENVIRONMENTAL OFFICER
(Waste Management Cell)

14. Applicant shall immunise all its health care workers and others, involved in handling of bio-medical waste for protection against diseases including Hepatitis B and Tetanus that are likely to be transmitted by handling of bio-medical waste, in the manner as prescribed in the National Immunisation Policy or the guidelines of the Ministry of Health and Family Welfare issued from time to time;
15. Applicant shall establish a Bar- Code System for bags or containers containing bio-medical waste to be sent out of the premises or place for any purpose;
16. Applicant shall ensure segregation of liquid chemical waste at source and ensure pre-treatment or neutralisation prior to mixing with other effluent generated from health care facilities.
17. Applicant shall ensure treatment and disposal of liquid waste in accordance with the Water (Prevention and Control of Pollution) Act, 1974 (6 of 1974);
18. Applicant shall ensure occupational safety of all its health care workers and others involved in handling of biomedical waste by providing appropriate and adequate personal protective equipments;
19. Applicant shall conduct health check up at the time of induction and at least once in a year for all its health care workers and others involved in handling of bio- medical waste and maintain the records for the same;
20. Applicant shall maintain and update on day to day basis the bio-medical waste management register and display the monthly record on its website according to the bio-medical waste generated in terms of category and colour coding as specified in Schedule I the Bio-Medical Waste Management Rules, 2016;
21. Applicant shall report major accidents including accidents caused by fire hazards, blasts during handling of biomedical waste and the remedial action taken and the records relevant thereto, (including nil report) in Form I to the prescribed authority and also along with the annual report;
22. Applicant shall make available the annual report on its web-site and all the health care facilities.
23. Applicant shall inform the prescribed authority immediately in case the operator of a facility does not collect the bio-medical waste within the intended time or as per the agreed time;
24. Applicant shall establish a system to review and monitor the activities related to bio-medical waste management, either through an existing committee or by forming a new committee and the Committee shall meet once in every six months and the record of the minutes of the meetings of this committee shall be submitted along with the annual report to the prescribed authority and the healthcare establishments having less than thirty beds shall designate a qualified person to review and monitor the activities relating to bio-medical waste management within that establishment and submit the annual report;
25. Applicant shall maintain all record for disposal of biomedical waste for a period of five years.
26. The applicant shall immediately adopt bar coding system for Bio medical waste
27. The applicant shall update COVID Bio Medical Waste data in CPCB tracking software at bmw.cpcbcr.com/#/p/login.

Beyond campus activities towards sustainability and environmental conservation. Conducted by constituent colleges and NSS Units of KLE Academy of Higher Education and Research

- **Training school children towards tree plantation, ill effects of Plastic, environment conservation, water conservation etc.**
- **Training villagers in the adopted villages towards tree Plantation, ill effects of plastic, environment conservation, Water conservation etc.**
- **Other extension activities**

Description of participation by NSS/NCC/Red cross/YRC, Institutional clubs etc., yearwise for the last 5 years

The NSS Cell of the KLE University was established in April 2006 has now completed fourteen years of existence. The NSS Unit I of the constituent colleges of KLE University were established in 1996, previously working under RGUHS Bangalore, now shifted to KLE University.

There are nine NSS Units under the eight constituent colleges of KLE University. One Self Finance Unit has also been functioning under J.N. Medical College, Belagavi since 2012 and has been recognized by the NSS RC, Bengaluru as Self Finance Unit in 2015.

Total Enrolment of NSS Volunteers is around 1300 every year (600 Regular limits plus 50 under SFU per year). Annual special camps at adopted villages are conducted with an objective to create awareness about the importance of clean water, water-borne diseases, Tree saplings plantation (Vanamahotsava), Cleanliness and Health awareness and free health check-up camps for the benefit of the public.

Our NSS units have participated in the campaigns started by MHRD and UGC and other ministries of Govt of India like National skill development mission, Digital cashless transaction. Road safety, Swaccha Bharat Abhiyan, Pulse polio and Measles Rubella Elimination Campaigns.

Innovative programs like Faculty Birthday plantation and monthly voluntary Blood Donation camps have been organized.

Many health awareness talks have been organized on KLE Community Radio Station Venudhwani 90.4 FM of the University by our NSS Units.

The HIV / AIDS awareness programme, Pulse Polio Immunization, Nutrition importance of healthy diet and safe motherhood days impacted the women and motivated their husbands to stop consuming. The voluntary blood donation camps have been regularly conducted by all the constituent colleges.

The school 'college campuses/ adopted villages have been cleaned under Swachh Bharat Abhiyaan and under Vanamahotsava – tree saplings were planted in the campuses.

KAHER NSS Chapters

NSS Cordinators

- NSS Programme Coordinators:
 - Dr. Rajendra B. Bhandankar (2006-2013)
 - Dr. Shivaswamy M.S. (2013-2019)

To

The Medical Directorate & CEO
KLEs Dr. Prabhakar Kore Hospital & MRC,
Nehru Nagar, Belagavi.

Sub: Report regarding two Thyroid camps.

Respected Sir,

International thyroid awareness week is celebrated every year in the third week of May. We have conducted Thyroid camp on 25.05.2022 in the Department of Endocrinology. 43 patients (22 new patients and 21 old patients) have attended the camp.

On 15-06-2022 free thyroid camp with Rotary club was conducted in Nippani, 110 patients have attended the camp. Free thyroid function tests, RBS were done and free medicines were provided.

With regards

Dr Vikrant Ghatnatti,

DM (Endocrinology),

Professor and Head
