OVERVIEW

KLE SOCIETY, BELAGAVI

On the 13th of November, 1916, a pioneering effort was begun, that would change the educational landscape of North Karnataka. This was the day the first institution of the KLE Society was established. The founders of K.L.E.S pledged to dedicate for the cause of education with noble ideals and fertile imagination in heart & established Karnataka Lingayat Education Society. They are also addressed as “Saptarishis” in honour of their unparalleled service in the field of education. From humble beginnings rooted in the sacrifice of its founders, the Society now runs over 309 institutions and 16 Hospitals across Karnataka and overseas ranging from kindergarten to post-doctoral research. The underlying philosophy was to encourage individual learning and transform the mindset of the average citizen. The outcome of which, would transform society and bring about positive change. Currently over 1,38,000 students are pursuing their academic dream in these institutions that impart quality education in areas ranging from Healthcare Delivery, Agriculture, Engineering, IT, Law, Fashion Technology, Hotel Management, Tourism Administration, Pharmacy, Homeopathy, Music and Broadcasting through FM Radio, Nursing, B-Schools etc. They are inspired and guided by an accomplished and highly qualified faculty consisting of over 18,000 committed individuals who share a common passion for education. In 2006, the KLE Society attained the key objective of gaining recognition from the University Grants Commission (UGC) for the KLE Academy of Higher Education and Research (Deemed-to-be University). The University takes immense pride in its curriculum and endeavors to follow internationally accepted education and healthcare practices. A new era dawns at the KLE Society with the birth of the KLE Technological University (Under Karnataka University Act, 2013) I am indeed fortunate to be at the helm of the KLE Society and humbly follow in the imposing footsteps of its visionary founders. We have always been inspired by their lofty principles, driven by their integrity and desire to serve society.

Unmindful of the constraints, KLE ensures that every individual with a desire to learn, irrespective of which strata he/she belongs to, has access to the infrastructure of international standards. As the KLE Society navigates successfully beyond a century of excellence, we rededicate ourselves to its service with renewed enthusiasm and sincerely thank all those who have been part of this glorious journey of over a 100 years and countless dreams

JNMC Women's and Children's Health Research Unit

Brief Report:

The Women's and Children's Health Research Unit (WCHR) of Jawaharlal Nehru Medical College of KLE Academy of Higher Education and Research (Deemed-to-be-University) (KAHER)'s has been conducting Community/Facility-based research aimed at reducing maternal and newborn mortality and morbidity since 2001. Over the past twenty-two years, JNMC's multi-disciplinary research team in collaboration with international multi-disciplinary team of clinicians, basic medical scientists, nutritionists, public health experts, information technology specialists, and other research staff with essential expertise and skills, including those trained for infant and early childhood growth and neurodevelopment assessment.

The WCHR has participated in 52 research studies (with the majority being multi-country and multicentre), with 38 completed over the last 22 years and published more than 230 research publications out of these trials in collaboration with 51 universities and research institutions from the USA, UK, Canada, Zambia, South Africa, Australia, and various institutes across India with funding support of Rs. 175 crores from 17 sponsors including: WHO, NIH, BMGF, Thrasher Research Fund, UK-Medical Research Council, and Department of Biotechnology, Government of India.

The WCHR has been funded by National Institute of Child Health and Human Development (NICHD) Global Network since the inception of the network in 2001. It has been refunded recently for the next seven-year cycle of the Global Network through 2030.

The WCHR is designated as a "WHO Collaborating Center for Research in Maternal and Perinatal Health" for a period of four years w.e.f. September 16, 2019 and it is currently in the process of getting re-designated for a further period of four years till 2027.

The WCHR always assures adequate staffing so that multiple studies can be carried out concurrently during the specified time frame, and trained research staff can be sustained and expanded as necessary. The unit's research priorities include: Postpartum Hemorrhage, Hypertensive Disorders of Pregnancy, Maternal Nutrition, Birth Asphyxia, Preterm Birth, Infant Neurodevelopment, Health System Strengthening and Community-based Maternal Newborn Health Registry. The results of these insightful research studies have had a profound impact at national and international levels in shaping public health policies.

The WCHR has established strategic relationships with 20 Indian academic institutions from Karnataka, Maharashtra, Rajasthan, Uttar Pradesh, Chandigarh and Odisha to develop a collaborative network; which provides access to secondary and tertiary health facilities for implementation of research protocols.

The WCHR has a well-equipped central office on the KAHER campus with facilities to securely archive study data, a pharmacy for storing and packaging clinical trial medications in a controlled environment, access to training facilities and audio-visual equipment, state-of-the-art network, computers, printers and sophisticated telecommunication capabilities that enable fast and dependable communication with collaborating partners. The WCHR at Belagavi has a separate temperature-controlled room with power backup housing a 70 Mbps lease line with 128 direct IP setup, two mirror-configured REDCap servers, additional dedicated servers for data storage and transmission, electronic data capture, data hosting services, and a data archival room. Twenty-five auxiliary data centers established by the WCHR and trained data management staff are available at all the other collaborating institutions of India.

The human fetus from a month old till its mature stage and other fascinating rarities such as huge tumors removed from the body are exhibited, making it veritable bank of a visual reference. The pathology museum is one of the best in Asia. About 1401 specimens are organized in a systematic fashion, helping the postgraduates & undergraduates in understanding the anatomic pathology. The arrangement of the museum is based on the 'The Burrows Welcome Museum' at London. The Clinical Skill laboratory is a unique facility to train the students using simulation technology. The students get hands on opportunity to perform clinical procedures on models, manikins, tissues and simulators.

JNMC Scientific Society conducts fortnightly clinical meetings where interesting cases of different specialities are discussed resulting in widening the perspective of the clinicians and breaking the barriers between the specialities for the benefit of the learners and the patients. An annual CME is a regular activity of the society for the last 40 years to update mainly the practicing family physicians.

The college has several collaborations with ICMR, WHO, NIH, University of Illinois, Chicago, USA, University of Missouri, Kansas City, USA, for teaching and research. The college has been also engaged in several funded research projects and has published papers in refereed national and international journals of high impact factor.

The college encourages the student's association to organise several cultural, literary and sports activities under the guidance of the faculty. Spiritual leaders are invited to deliver motivating talks. Historical days and National Festivals are celebrated. College provides full opportunity to facilitate overall and holistic development of the students into culturally sensitive and socially responsible, good citizens which is as important as graduating from a medical college.

The mentorship program is another 'student friendly' program; the mentors perform the role of local guardians, monitor the students assigned to them and provide personal and academic counselling.

JNMC is recognized by the Medical Council of India, and also by the Malaysian Medical Council, and listed in W.H.O. directory of World Medical Institutions. The institution boasts of having committed faculty of eminence. The alumni of the college are well placed in medical colleges and research institutes of repute in India and abroad and are considered respectable authorities in their respective specialities- a matter of pride to the KLE Academy of Higher Education and Research (Deemed-to-be-University).

"It's my honour to be in eminent capacity as Medical Director at this esteemed medical institution KLE's Prabhakar Kore Hospital and Medical Research Center!! and I usher a great privilege to present, our annual report with stellar performance by many attributes for the year April 2022 to March 2023".

Our current bed capacity of 2400 at hospital serving all the sections of the society makes us one of the largest private hospital in southern India. It's a stellar attainment under the leadership of our beloved Chairman Dr Prabhakar Kore. This speaks in volume about his leadership, strategic vision where we are now as an Institution. He transformed our hospital into a leading healthcare service provider in the country. I feel motivated all through, as he is truly an inspirational leader and I congratulate on this tremendous feat of migrating hospital to newer level of servicing the community.

Our maiden initiative to penetrate rural sector, we conducted a thorough research through primary interactions with doctors, patients, families, hospital staff, volunteers and health care partners in our magnanimous goal of setting up satellite ICU units at rural sector and running them efficiently has tasted a huge success. I sincerely thank for this tremendous effort through hardcore dedication of a talented consultants, caring professional nurses, committed staff members with smart administrative policy makers. The previous year has created a strong foothold across newer arenas in which we continue to move forward with our one-line mission "WE CARE – WE CURE as well WE COMMIT OUR SERVICES TOO".
