VISION

To be an outstanding University of excellence ever in pursuit of newer horizons to build self reliant global citizens through assured quality educational programs.

MISSION

- To promote sustainable development of higher education consistent with statutory and regulatory requirements.
- To plan continuously provide necessary infrastructure, learning resources required for quality education and innovations.
- To stimulate and to extend the frontiers of knowledge, through faculty development and continuing education programs.
- To make research a significant activity involving staff, students and society.
- To promote industry / organization, interaction/collaborations with regional/national / international bodies.
- To establish healthy systems for communication among all stakeholders for vision oriented growth.
- To fulfill the national obligation through rural health missions.

OBJECTIVES

The objectives are to realize the following at university and its constituent institutions:

- To implement effectively the programs through creativity and innovation in teaching, learning and evaluation.
- To make existing programs more career oriented through effective system of review and redesign of curriculum.
- To impart spirit of enquiry and scientific temperament among students through research oriented activities.
- To enhance reading and learning capabilities among faculty and students and inculcate sense of life long learning.
- To promulgate process for effective, continuous, objective oriented student performance evaluation.
- To ordinate periodic performance evaluation of the faculty.
- To incorporate themes to build values. Civic responsibilities & sense of national integrity.
- To ensure that the academic, career and personal counseling are in-built into the system of curriculum delivery.
- To strengthen, develop and implement staff and student welfare programs.
- To adopt and implement principles of participation, transparency and accountability in governance of academic and administrative activities.
- To constantly display sensitivity and respond to changing educational, social, and community demands.
- To promote public-private partnership.

[I] PREAMBLE:

KLE University is determined to encourage quality research in different disciplines of Health Sciences, keeping in view the global requirements of health care, with national needs as the focal point.

The Doctor of Philosophy (Ph.D.) Program in Health Sciences and Inter-disciplinary area (wherein one of the disciplines shall be health sciences) is proposed with an objective of promoting the cause of quality research in thrust or priority areas. The UGC expects from Deemed Universities activities related to research, development, extension and consultation, all being aimed at attaining academic excellence.

The infrastructure facilities and human resources available at the KLE University health science institutions shall be effectively utilized for promoting quality research in health sciences and inter-disciplinary areas. To facilitate interdisciplinary research, a Dean and separate Board of Studies has been constituted.

[II] AIMS & OBJECTIVES OF THE Ph.D. PROGRAMME

- To gain expertise and knowledge in a specialized field of research.
- Design, implement & report a research project.

III. DISCIPLINES:

Admission to Ph.D. program will be made under the following faculties, covering a wide spectrum of disciplines:

I. FACULTY OF MEDICINE:

A) Pre-Clinical:
- Anatomy
- Physiology
- Biochemistry

B) Para-Clinical:
- Pharmacology
- Pathology
- Microbiology
- Forensic Medicine
- Community Medicine

C) Clinical:

Medicine and Allied Subjects:
- Medicine
- Paediatrics
- Pulmonary Medicine
- Dermatology
- Psychiatry

Surgery and Allied Subjects:
- Surgery
- Orthopaedics
- ENT & Head & Neck Surgery (HNS)
- Ophthalmology

Obstetrics & Gynaecology, Anaesthesiology and Radiology:
- Obstetrics & Gynaecology
- Anaesthesiology
- Radiology

D) Superspecialities:
- Cardiovascular and Thoracic Surgery
- Urology
- Plastic Surgery
- Cardiology
- Neurology
- Neurosurgery
- Paediatric Surgery

Other Disciplines of Health Sciences:

- Hospital Administration
- Public Health

E) Medical Education

II. FACULTY OF DENTISTRY:

A) Pre-Clinical:

- Dental Anatomy & Oral Histology
- Dental Material

B) Clinical:

- Prosthodontics
- Orthodontics
- Periodontics
- Oral Surgery
- Pedodontics
- Oral Diagnosis and Radiology
- Conservative Dentistry
- Community Dentistry
- Oral Pathology and Microbiology

III. FACULTY OF PHARMACEUTICAL SCIENCES:
All subjects of Pharmaceutical Sciences

IV. FACULTY OF AYURVEDA:
All subjects of Ayurvedic Sciences

V. FACULTY OF NURSING:
All subjects of Nursing Sciences

VI. FACULTY OF PHYSIOTHERAPY:
All subjects of Physiotherapy

VII. FACULTY OF SCIENCE (Inter-disciplinary Studies / Research) (Involving Health Sciences) which also includes:

- Biostatistics, M.Sc., M.Lib., Masters in Physical Education

VIII. BASIC MEDICAL SCIENCES.

PRE-Ph.D. EXAMINATION
(Based on UGC Guidelines, 2016)

i) The candidates admitted to Ph.D. Programme shall have to appear for Pre-Ph.D. examination.

ii) Pre-Ph.D. examination shall be conducted after one year from the date of registration.

iii) The Controller of Examinations shall conduct the Pre-Ph.D. examination. The registration of such candidates, who do not pass the Pre-Ph.D. examination in five consecutive attempts from the date of registration, shall be cancelled.

iv) The Pre-Ph.D. examination for all the faculties shall consist of examination in three theory papers. The first two papers of three hours duration with 100 marks each and biostatistics paper is of two hours with 50 marks. The common paper (Paper I) shall be on the topics covered in the syllabus for orientation programme as described under course work of 300 hours. The paper two shall be on the topics related to the research discipline of the candidate. The biostatistics paper (Paper III) on the topics covered in the syllabus for the orientation programme of 150 hours as described. The syllabi for the papers shall be notified by the Dean and Director Academic Affairs with the approval of Vice-Chancellor. The Examiner appointed by Vice-Chancellor shall set the common paper and special paper and biostatistics paper. The two Examiners appointed by Vice-Chancellor shall evaluate the papers and the average of the two will be taken into consideration.

v) The minimum pass marks of all the 3 papers shall be 55 %. If the candidate fails in a paper he or she has to appear only in that paper.

Ph.D. ORIENTATION PROGRAMME

PAPER – I (Research & Research Methodology)
Theory: 180 hrs *(Credits: 6)*;
Practicals: 120 hrs *(Credits: 2)*

1. Introduction to Ph. D Programme: **Th: 10hrs**

Introduction to the course, course objectives, Open House Discussion, timely submission of Half yearly Reports & Synopsis submission, publication and submission of articles.

National Knowledge Commission, National Assessment and Accreditation Council (NAAC) & University Grant Commission (UGC).

2. Historical Perspectives: **Th: 15hrs**

Historical narration about conduct of research on human subject, Biblical times, research on vulnerable population, tackling of ethical issues in the past century. Ethical code, Nuremberg code, Helsinki declaration, Belmont principles in conduct of research in human subject.

3. Ethical Issues in Research: **Th: 40hrs**

Background, general principles on ethical considerations involving human participants, general ethical issues, Ethical Review Committee – need, relevance and working, rules & regulations as applicable in India. Ethical Review Procedures, IRB. Principles for clinical evaluation of drugs/ devices/diagnostics/vaccines/ herbal remedies. Informed Consent Process – Preparing an informed consent for a research project.

4. Approach to Research in Health Science: Th: 16 hrs;Pr: 25hrs

Research protocol development.

Research Methodology – Defining research questions/

Hypothesis, Study designs - cross sectional study, case control study and randomized clinical trials.

Clinical Trials – Introduction, composition, procedures & records, Informed consent, responsibility & rules applicable to investigators and sponsors, reporting of adverse events and other related ethical issues.

5. Grant Writing : **Th: 5 hrs; Pr: 8 hrs**

Introduction, specific aims, review of literature, measures, methodology, study plan and statistical analysis. Protection of human participants, proposed budget and time line for the proposal. Serious Adverse Effects, Pre-Clinical Research / Translational Research.

Information regarding National /International organizations to avail research grants.

Patents and Intellectual Property Rights.

6. Manuscript Writing: **Th: 5 hrs**

Writing a scientific manuscript, structured writing and language editing, writing respondents & presentation, impact factor, plagiarism, bibliography, referencing & citations, Good Clinical Practices (GCP) and safety.

Hands-on workshop on writing abstracts and manuscripts.

7. Critical Appraisal of Article Published in Scientific Journal: Th: 6 hrs; Pr: 16 hrs

What is critical appraisal and why critical appraisal, present scenario of scientific publications, methodology of critical appraisal, format for critical appraisal.

8. Thesis Writing: **Th: 5 hrs**

Introduction to thesis writing, prescribed format for thesis writing, seminar presentations, preparation for Viva-Voce & communication skills.

9. **Health care delivery systems in India:** **Th: 8 hrs**

National Population Policy.

National Health Policy.

National Rural Health Mission (NRHM program).

RCH program.

Current Health Problems.

Environment & health related challenges of India.

Non Communicable Diseases.

Biomedical waste management.

Emerging and re-emerging infectious diseases in the world and in India.

Population explosion causes and its impact.

10. **Online Certificate Course on "Health Research Fundamentals" by ICMR:** **Pr: 5 hrs**

11. **Attending Ph.D. 6-monthly presentations:** **Th: 50 hrs**

12. **Visit to Regional Medical Research Centre (RMRC), Belagavi:** **Pr: 18 hrs**

13. **Visit to Basic Science Research Centre (BSRC):** **Pr: 18 hrs**

14. **Library Hours for Self Study:** **50 hrs**

Paper II (Syllabus related to Research Discipline)

Theory: 60 hrs (*Credits: 2*);

Practicals: 120 hrs (*Credits: 2*)

1. **Topics related to research discipline: Th: 60 hrs; Pr: 30 hrs**

Topics related to the research discipline of the candidate and the research supervisors are required to submit the detailed syllabus to the Office of the Academic Affairs within three months of the registration of the candidate.

2. **Attending Discipline-related Workshops/CMEs/Seminars/ Conferences:** **Pr: 35 hrs**

3. **Attending Ph.D. Open House Seminars:** **Pr: 25 hrs**

4. **Attending Ph.D. Open Defence Viva:** **Pr: 30 hrs**

Paper III (Biostatistics)

Theory: 90 hrs *(Credits: 3)*;

Practicals: 60 hrs *(Credits: 1)*

Basic Statistics:

1. Introduction to Bio-statistics, translating research problem into hypothesis, hypothesis testing, Type I & Type II errors in statistics, checking errors in data and correcting them.
2. Study designs & sample size estimation, sampling techniques, methods in statistical inference, sampling distribution.
3. Types of variables and types of data measurements scales, Data Collection methods & Scrutiny, presentation & organization of data – Tabular / Graphical Form, Analysis of quantitative, qualitative & categorical data.
4. Sampling Designs, Descriptive Statistics - Measures of central tendency & measures of dispersion, Correlation Analysis, Regression Analysis, Probability Theory - Binominal distribution, Poisson distribution, normal distribution, concept of testing of hypothesis.
5. Test of Significance- Parametric tests-Z test, T test, ANOVA and Non Parametric tests- Chi- Square test, Wilcoxson Rank test, Kruskal Wallis test.
6. Devising conclusion from data analysis.
7. Use of computers, statistical software's, data cleaning.

SCHEME OF PRE-Ph.D. Examination

Paper – I: All topics covered in the syllabus for orientation programme as described under course work of 300 hours.

Paper – II: The topics related to the research of the candidate.

Paper – III: Biostatistics: The topics covered in the syllabus for orientation programme as described under course work of 150 hours.

PATTERN OF QUESTION PAPERS

Paper I & II shall be of 3 hours duration with 100 marks each. Both papers shall contain 2 long questions of 20 marks each and 6 questions of 10 marks each. The candidate has to attempt all the questions. **Paper III** shall be of 2 hours duration of 50 marks. The paper shall contain 2 long questions of 10 marks each and 5 short questions of 6 marks each.

The candidate has to score minimum of 55 % marks in each paper for being declared as pass.

Two Examiners appointed by Vice-Chancellor shall evaluate the papers and the average of the two will be taken into consideration.

A Ph.D. scholar has to obtain a minimum of 55% or its equivalent grade in the UGC 7-points scale (or an equivalent grade/ CGPA in a point scale wherever grading system is followed) in the course work in order to be eligible to continue the programme and submit the thesis, as depicted in the table below:

Letter Grade and Grade Point equivalent to marks in percentage and performance

Marks Obtained (%)	Grade Point	Grade	Performance
91.00-100.00	10	O	Outstanding
81.00-90.99	9	A+	Excellent
71.00-80.99	8	A	Good
61.00-70.99	7	B	Average
55.00-60.99	6	P	Pass
Less than 55	00	F	Fail
Absent	00	F	Fail

If the candidate fails in a paper, he/she has to re-appear only in that paper.

CONTENTS

RESEARCH METHODOLOGY AND MEDICAL STATISTICS

AIMS

Providing basic knowledge about research methodology, biostatistics and its need and importance in present trend of Ayurveda. To ignite the young minds with the research vision at primary level so that the hidden potential of Ayurveda science can be explored and put forth of present evidence based medicine era. Initiative effort to accomplish the vision of Tradition, Technology and Innovation in the field of Ayurveda.

OBJECTIVES

By the end of 4th profession the students should have basic knowledge about the methods of research and biostatistics.

Knowledge:

- The literal meaning of word research and its implication in Ayurveda
- Brief historical background of research in Ayurved and contemporary medical science Evidences of researches in ayurvedic classics
- Types of Research
- Research process
- Research tools
- The concept and importance of ethics in research
- Concept of Evidence Based Medicine and Scientific Writing
- Importance of IT in data mining and important research data portals concerned with Ayurved and contemporary medical science
- Definition, scope and importance of the Medical statistics
- Collection and Presentation of data
- Measures of location, central tendency.
- Variability and its measurement
- Introduction to probability and test of significance Parametric tests and non-parametric tests
- Introduction to commonly used statistical soft-wares.

Skills:

- To make capable of applying different research designs for different studies
- Skill of using particular statistical test for particular data
- Journal browing skills and keep them updated about the happenings in the field of Ayurveda
- Making eligible to read, understand and write the different articles in different journals

Attitude:

- Research oriented attitude towards the concepts of Ayurveda
- Evidence based practice
- Proper documentation and its importance
- Exploring the hidden potentials of Ayurveda through modern technology

RESEARCH METHODOLOGY

THEORY: 1 Paper (50 Mark)	Teaching Hours (Each 1 Hour): 50 Hours

Part- A

30 Marks — **30 Hours**

Sl.No	Topic	Hours
1	Brief historical background of research in Ayurved and contemporary medical science Evidences of researches in ayurvedic classics	2 Hours
2	Etymology, definitions and synonyms (Anveshana, Gaveshana, Prayeshana, Anusandhan and Shodha) of the word Research	2 Hours
3	Research in Ayurved - Scope, need, importance, utility	2 Hours
4	Types of Research (familiarization of the terms) a) Pure and Applied b) Qualitative, Quantitative and Mixed Observational and interventional.	5 Hours
5	Research process (Importance of each steps in brief) a. Selection of the topic b. Review of the literature c. Formulation of Hypothesis d Aims and Objectives e. Materials and methods f. Observations and results g. Methods of communication of Research	10 Hours
6	Research tools – Role of the pramanas as research tools	2 Hours
7	The concept and importance of ethics in research	2 Hours
8	Concept of Evidence Based Medicine and Scientific Writing	2 Hours
9	Importance of IT in data mining and important research data portals concerned with Ayurved and contemporary medical science (DHARA, PubMed, Ayush Research Portal, Bioinformatics Center, Research Management Informatic System etc.)	3 Hours

MEDICAL STATISTICS

Part- B

20 Marks — **20 Hours**

1	Definition, scope and importance of the Medical statistics	1 Hour
	Common statistical terms and notations a. Population b. Sample c. Data d. Variable e. Normal distribution	1 Hour
2	Collection, Types and Presentation of data a. Tabular b. Graphical c. Diagrammatical	2 Hours
3	Measures of location a. Average	1 Hour

	b. Percentile	
4	Measures of Central Tendency a. Arithmetic mean b. Median c. Mode	2 Hours
5	Variability and its measurement a. Range b. Standard deviation c. Standard error	2 Hours
6	Introduction to probability and test of significance Parametric tests and non parametric tests	10 Hours
7	Introduction to commonly used statistical soft-wares.	1 Hour

CONTENTS

SYLLABUS

Name Of The Subject : RESEARCH METHODOLOGY and MEDICAL STATISTICS	
Theory-200 Hours	Practical-200 Hours
Theory- 100 Marks	Practical-100 Marks

Part- A

Marks-60 RESEARCH METHODOLOGY 120 Hours

Unit	Topic	Hours
1	**Introduction to Research** A. Definition of the term research B. Definition of the term anusandhan C. Need of research in the field of Ayurveda	3 hr
2	**General guidelines and steps in the research process** A. Selection of the research problem B. Literature review: different methods (including computer database) with their advantages and limitations C. Defining research problem and formulation of hypothesis D. Defining general and specific objectives E. Research design: observational and interventional, descriptive and analytical, preclinical and clinical, qualitative and quantitative F. Sample design G. Collection of the data H. Analysis of data. I. Generalization and interpretation, evaluation and assessment of Hypothesis. J. Ethical aspects related to human and animal experimentation. K. Information about Institutional Ethics Committee (IEC) and Animal Ethics Committee (AEC) and their functions. Procedure to obtain clearance from respective committees, including filling up of the consent forms and information sheets and publication ethics.	18 hrs
3	Preparation of research proposals in different disciplines for submission to funding agencies taking EMR-AYUSH scheme as a model. Preparation of dummy EMR proposal (Detailed Project Report, Protocol, Budget & Timelines)	5 hrs
4.	**Scientific writing and publication skills.** a. Familiarization with publication guidelines- Journal specific and CONSORT guidelines. b. Different types of referencing and bibliography. c. Thesis/Dissertation: contents and structure d. Research articles structuring: Introduction, Methods, Results and Discussions (IMRAD) e. Journal Author guidelines, Indexed Journal, Citation, Impact Factor	5 hrs

5	**Classical Methods of Research.** Concept of Pratyakshadi Pramana Pariksha, their types and application for Research in Ayurveda. Dravya, Guna, Karma Parikshana Paddhati Aushadhi-yog Parikshana Paddhati Swastha, Atura Pariksha Paddhati Dashvidha Parikshya Bhava Tadvidya sambhasha, vadmarga and tantrayukti	10 hrs
6	Comparison between methods of research in Ayurveda (Pratigya, Hetu, Udaharana, Upanaya, Nigaman) and contemporary methods in health sciences.	3 hr
7.	**Different fields of Research in Ayurveda** **Fundamental research on concepts of Ayurveda** a. Panchamahabhuta and tridosha. b. Concepts of rasa, guna, virya, vipak, prabhav and karma c. Concept of prakriti-saradi bhava, ojas, srotas, agni, aam and koshtha.	6 hrs
8.	**Literary Research** Introduction to manuscriptology: Definition and scope. Collection, conservation, cataloguing. Data mining techniques, searching methods for new literature; search of new concepts in the available literature. Methods for searching internal and external evidences about authors, concepts and development of particular body of knowledge	8 hrs
9.	**Drug Research (Laboratory-based)** Basic knowledge of the following: Drug sources: plant, animal and mineral. Methods of drug identification. Quality control and standardization aspects: Basic knowledge of Pharmacopoeial standards and parameters as set by Ayurvedic Pharmacopoeia of India. Information on WHO guidelines for standardization of herbal preparations. Good Manufacturing Practices (GMP) and Good Laboratory Practices (GLP).	20 hrs
10.	**Safety aspects** Protocols for assessing acute, sub-acute and chronic toxicity studies. Familiarization with AYUSH guidelines (Rule 170), CDCSO and OECD guidelines.	5 hrs
11.	**Introduction to latest Trends in Drug Discovery and Drug Development** -Brief information on the traditional drug discovery process -Brief information on the latest trends in the Drug Discovery process through employment of rational approach techniques; anti-sense approach, use of micro and macro-arrays, cell culture based	10 hrs

	assays, use of concepts of systems biology and network physiology -Brief introduction to the process of Drug development	
12.	**Clinical research** Introduction to Clinical Research Methodology identifying the priority areas of Ayurveda Basic knowledge of the following:- Observational and Interventional studies Descriptive & Analytical studies Longitudinal & Cross sectional studies Prospective & Retrospectives studies Cohort studies Randomized Controlled Trials (RCT) & their types Single-case design, case control studies, ethnographic studies, black box design, cross-over design, factorial design. Errors and bias in research. New concepts in clinical trial- Adaptive clinical trials/ Good clinical practices (GCP) Phases of Clinical studies: 0,1,2,3, and 4. Survey studies - Methodology, types, utility and analysis of Qualitative Research methods. Concepts of in-depth interview and Focus Group Discussion.	18 hrs
13.	Pharmacovigilance for ASU drugs. Need, scope and aims & objectives. National Pharmacovigilance Programme for ASU drugs.	3 hrs
14.	Introduction to bioinformatics, scope of bioinformatics, role of computers in biology. Introduction to Data base- Pub med, Medlar and Scopus. Accession of databases.	3 hrs
15.	Intellectual property rights – different aspects and steps in patenting. Information on traditional knowledge digital library.	3 hrs

Part- B
MEDICAL STATISTICS

Marks-40 **Hours – 80**

Unit	Topic	Hrs
1.	**Definition of Statistics** - Concepts, relevance and general applications of Biostatistics in Ayurveda	3 hr
2.	**Collection, classification, presentation, analysis and interpretation of data** (Definition, utility and methods)	5 hr
3.	**Scales of Measurements** - nominal, ordinal, interval and ratio scales.	3 hr
4.	**Types of variables** – Continuous, discrete, dependent and independent variables.	3 hr
5.	**Type of series** – Simple, Continuous and Discrete	2 hr
6.	**Measures of Central tendency** – Mean, Median and Mode.	5 hrs
7.	**Variability:** Types and measures of variability – Range, Quartile deviation, Percentile, Mean deviation and Standard deviation	5 hrs

	Interquartile range, coefficient of variation	
8.	**Probability**: Definitions, types and laws of probability,	3 hrs
9.	**Normal distribution**: Concept and Properties, Sampling distribution, Standard Error, Confidence Interval and its application in interpretation of results and normal probability curve.	4 hrs
10.	**Fundamentals of testing of hypotheses:**	
	a. Null and alternate hypotheses, type I and type 2 errors. b. Tests of significance: Parametric and Non-Parametric tests, level of significance and power of the test, 'P' value and its interpretation, statistical significance and clinical significance	2 hrs 6 hrs
11.	**Univariate analysis of categorical data:**	
	Confidence interval of incidence and prevalence, Odds ratio, relative risk and Risk difference, and their confidence intervals Introduction to Meta analysis	6 hrs
12.	**Parametric tests:** 'Z' test, Student's 't' test: paired and unpaired, 'F' test, Analysis of variance (ANOVA) test, repeated measures analysis of variance	6 hrs
13.	**Non parametric methods:** Chi-square test, Fisher's exact test, McNemar's test, Wilcoxon test, Mann-Whitney U test, Kruskall – Wallis with relevant post hoc tests (Dunn)	8 hrs
14.	**Correlation and regression analysis:**	
	a. Concept, properties, computation and applications of correlation, Simple linear correlation, Karl Pearson's correlation co-efficient, Spearman's rank correlation. b. Regression- simple and multiple.	5 hr
15.	**Sampling and Sample size computation for Ayurvedic research:**	
	Population and sample. Advantages of sampling, Random (Probability) and non random (Non-probability) sampling. Merits of random sampling. Random sampling methods- simple random, stratified, systematic, cluster and multiphase sampling. Concept, logic and requirement of sample size computation, computation of sample size for comparing two means, two proportions, estimating mean and proportions.	6 hrs
30	**Vital statistics and Demography**: computation and applications - Rate, Ratio, Proportion, Mortality and fertility rates, Attack rate and hospital-related statistics	4 hr
31	**Familiarization with the use of Statistical software** like SPSS/Graph Pad	4 hr

PRACTICAL: RESEARCH METHODOLOGY Marks - 50 Hours-120		
Unit	**Topic**	**Hours**
1.	**Pharmaceutical Chemistry** Familiarization and demonstration of common lab instruments for carrying out analysis as per API	20 hrs
2.	**Awareness of Chromatographic Techniques** Demonstration or Video clips of following: • Thin-layer chromatography (TLC) • Column chromatography (CC) • Flash chromatography (FC) • High-performance thin-layer chromatography (HPTLC) • High Performance (Pressure) Liquid Chromatography (HPLC) • Gas Chromatography (GC, GLC)	28 hrs
3.	**Pharmacognosy** Drug identification as per API including organoleptic evaluation	6 hrs
4.	4. **Pharmacology and toxicology** Familiarization and Demonstration of different techniques related to: • Pharmacology and toxicology • Drug administration techniques- oral and parenteral. • Blood collection by orbital plexuses puncturing. • Techniques of anesthesia and euthanasia. • Information about different types of laboratory animals used in experimental research	20 hrs
5.	**Biochemistry (Clinical)** Familiarization and demonstration of techniques related to • Basic instruments used in a clinical biochemistry laboratory – semi and fully automated clinical analyzers, electrolyte analyzer, ELISA-techniques, nephelometry • Demonstration of blood sugar estimation, HbA1C • Lipid profiles • Kidney function test • Liver function test • Cystatin and microalbumin estimation by nephelometry or other suitable techniques • Interpretation of the results obtained in the light of the data on normal values	20 hrs
6.	**Clinical Pathology** Familiarization and demonstration of techniques related to • Basic and advanced instruments used in a basic clinical pathology lab • Auto cell counter- urine analyzer-ESR-microscopic examination of urine	16 hrs

7.	**Imaging Sciences** Familiarization and demonstration of techniques related to the • Imaging techniques • Video film demonstration of CT-Scan MRI-scan- and PET-scan	08 hrs
8.	**Clinical protocol development**	02 hrs

PRACTICAL: **MEDICAL STATISTICS** **Marks - 50**		**Hours-80**
Unit	**Topic** Exercises on the Problems related to following Topics	**Hrs**
1.	**Collection, classification, presentation, analysis and interpretation of data** (Definition, utility and methods)	5 hrs
2.	**Types of variables** – Continuous, discrete, dependent and independent variables.	5 hrs
3.	**Type of series** – Simple, Continuous and Discrete	5 hrs
4.	**Measures of Central tendency** – Mean, Median and Mode.	5 hrs
5.	**Variability:** Types and measures of variability – Range, Quartile deviation, Percentile, Mean deviation and Standard deviation	5 hrs
6.	**Probability**: Definitions, types and laws of probability	5 hrs
7.	**Normal distribution**: Concept and Properties, Sampling distribution, Standard Error, Confidence Interval and its application in interpretation of results and normal probability curve.	5 hrs
8.	**Fundamentals of testing of hypotheses** • Null and alternate hypotheses, type I and type 2 errors. • Tests of significance: Parametric and Non-Parametric tests, level of significance and power of the test, 'P' value and its interpretation, statistical significance and clinical significance	5 hrs
9.	**Univariate analysis of categorical data:** Confidence interval of incidence and prevalence, Odds ratio, relative risk and Risk difference, and their confidence intervals	9 hrs
10.	**Parametric tests** • 'Z' test • Student's 't' test: paired and unpaired • 'F' test • Analysis of variance (ANOVA) test • Repeated measures analysis of variance	10 hrs
11.	**Non parametric methods** • Chi-square test • Fisher's exact test	8 hrs

	• McNemar's test • Wilcoxon test • Mann-Whitney U test • Kruskall – Wallis with relevant post hoc tests (Dunn)	
12.	**Correlation and regression analysis** Concept, properties, computation and applications of correlation, Simple linear correlation, Karl Pearson's correlation co-efficient, Spearman's rank correlation. Regression- simple and multiple.	4 hrs
13.	**Sampling and Sample size computation for Ayurvedic research** • Population and sample • Advantages of sampling • Random (Probability) and non-random (Non-probability) sampling. • Merits of random sampling. • Random sampling methods- simple random, stratified, systematic, cluster and multiphase sampling. • Concept, logic and requirement of sample size computation • Computation of sample size for comparing two means, two proportions • Estimating mean and proportions.	8 hrs
14.	**Vital statistics and Demography:** computation and applications - Rate, Ratio, Proportion, Mortality and fertility rates, Attack rate and hospital-related statistics	2 hrs
15.	**Familiarization with the use of Statistical software** like SPSS/Graph Pad	4 hrs

RESEARCH METHODOLOGY & MEDICAL STATISTICS **Practical Marks: 100**

Sl no	Particulars	Details	Marks distribution
01	**Records** ***	20 & 05 Practicals conducted in CRF & Animal house. + 10 Medical Statistics related numericals.	----
02	**Procedure of any two practicals**	**Procedure of any two practicals in CRF** Writing two procedures among given set of preparations in detail **with values obtained.**	20
03	**Instruments**	Identification of instruments with its uses.	10
04	**Spotting**	Specimens present in CRF (10 Specimens)	20
05	**Stat related problem**	Selection of data and its interpretation	20
06	**Viva Voce**	Part A -15 Marks Part B- 15 Marks	30
	Total		**100**

THE MASTER OF PHARMACY (M. PHARM.)

COURSE REGULATION 2014

(BASED ON NOTIFICATION IN THE GAZETTE OF INDIA NO. 362, DATED DECEMBER 11, 2014)

SCHEME AND SYLLABUS

PHARMACY COUNCIL OF INDIA
Combined Council's Building, Kotla Road,
Aiwan-E-Ghalib Marg, New Delhi-110 002.
Website : www.pci.nic.

Table of Contents

2 Ethics in Clinical Research: 12 Hrs

- Historical Perspectives: Nuremberg Code, Thalidomide study , Nazis Trials, Tuskegee Syphilis Study, The Belmont Report, The declaration of Helsinki
- Origin of International Conference on Harmonization - Good Clinical Practice (ICH-GCP) guidelines.
- The ethics of randomized clinical trials
- The role of placebo in clinical trials
- Ethics of clinical research in special population
- Institutional Review Board/Independent Ethics Committee/Ethics Committee – composition, roles, responsibilities, review and approval process and ongoing monitoring of safety data
- Data safety monitoring boards.
- Responsibilities of sponsor, CRO, and investigator in ethical conduct of clinical research
  - Ethical principles governing informed consent process
  - Patient Information Sheet and Informed Consent Form
  - The informed consent process and documentation

3 Regulations governing Clinical Trials 12 Hrs

India: Clinical Research regulations in India – Schedule Y & Medical Device Guidance

USA: Regulations to conduct drug studies in USA (FDA)

- NDA 505(b)(1) of the FD&C Act (Application for approval of a new drug)
- NDA 505(b)(2) of the FD&C Act (Application for approval of a new drug that relies, at least in part, on data not developed by the applicant)
- ANDA 505(j) of the FD&C Act (Application for approval of a generic drug product)
- FDA Guidance for Industry - Acceptance of Foreign Clinical Studies
- FDA Clinical Trials Guidance Document: Good Clinical Practice

EU: Clinical Research regulations in European Union (EMA)

Semester III

MRM 301T - Research Methodology & Biostatistics

UNIT – I

General Research Methodology: Research, objective, requirements, practical difficulties, review of literature, study design, types of studies, strategies to eliminate errors/bias, controls, randomization, crossover design, placebo, blinding techniques.

UNIT – II

Biostatistics: Definition, application, sample size, importance of sample size, factors influencing sample size, dropouts, statistical tests of significance, type of significance tests, parametric tests(students "t" test, ANOVA, Correlation coefficient, regression), non-parametric tests (wilcoxan rank tests, analysis of variance, correlation, chi square test), null hypothesis, P values, degree of freedom, interpretation of P values.

UNIT – III

Medical Research: History, values in medical ethics, autonomy, beneficence, non-maleficence, double effect, conflicts between autonomy and beneficence/non-maleficence, euthanasia, informed consent, confidentiality, criticisms of orthodox medical ethics, importance of communication, control resolution, guidelines, ethics committees, cultural concerns, truth telling, online business practices, conflicts of interest, referral, vendor relationships, treatment of family members, sexual relationships, fatality.

UNIT – IV

CPCSEA guidelines for laboratory animal facility: Goals, veterinary care, quarantine, surveillance, diagnosis, treatment and control of disease, personal hygiene, location of animal facilities to laboratories, anesthesia, euthanasia, physical facilities, environment, animal husbandry, record keeping, SOPs, personnel and training, transport of lab animals.

UNIT – V

Declaration of Helsinki: History, introduction, basic principles for all medical research, and additional principles for medical research combined with medical care.

Semester III

MRM 301T - Research Methodology & Biostatistics

UNIT – I

General Research Methodology: Research, objective, requirements, practical difficulties, review of literature, study design, types of studies, strategies to eliminate errors/bias, controls, randomization, crossover design, placebo, blinding techniques.

UNIT – II

Biostatistics: Definition, application, sample size, importance of sample size, factors influencing sample size, dropouts, statistical tests of significance, type of significance tests, parametric tests(students "t" test, ANOVA, Correlation coefficient, regression), non-parametric tests (wilcoxan rank tests, analysis of variance, correlation, chi square test), null hypothesis, P values, degree of freedom, interpretation of P values.

UNIT – III

Medical Research: History, values in medical ethics, autonomy, beneficence, non-maleficence, double effect, conflicts between autonomy and beneficence/non-maleficence, euthanasia, informed consent, confidentiality, criticisms of orthodox medical ethics, importance of communication, control resolution, guidelines, ethics committees, cultural concerns, truth telling, online business practices, conflicts of interest, referral, vendor relationships, treatment of family members, sexual relationships, fatality.

UNIT – IV

CPCSEA guidelines for laboratory animal facility: Goals, veterinary care, quarantine, surveillance, diagnosis, treatment and control of disease, personal hygiene, location of animal facilities to laboratories, anesthesia, euthanasia, physical facilities, environment, animal husbandry, record keeping, SOPs, personnel and training, transport of lab animals.

UNIT – V

Declaration of Helsinki: History, introduction, basic principles for all medical research, and additional principles for medical research combined with medical care.

4.4 BIOSTATISTICS AND RESEARCH METHODOLOGY (THEORY)

Theory : 2 Hrs. /Week

1. Detailed syllabus and lecture wise schedule

1 Research Methodology

a) Types of clinical study designs:
Case studies, observational studies, interventional studies,

b) Designing the methodology

c) Sample size determination and Power of a study
Determination of sample size for simple comparative experiments, determination of sample size to obtain a confidence interval of specified width, power of a study

d) Report writing and presentation of data

2 Biostatistics

2.1 a) Introduction

b) Types of data distribution

c) Measures describing the central tendency distributions- average, median, mode

d) Measurement of the spread of data-range, variation of mean, standard deviation, variance, coefficient of variation, standard error of mean.

2.2 Data graphics

Construction and labeling of graphs, histogram, piecharts, scatter plots, semilogarthimic plots

2.3 Basics of testing hypothesis

a) Null hypothesis, level of significance, power of test, P value, statistical estimation of confidence intervals.

b) Level of significance (Parametric data)- students t test (paired and unpaired), chi Square test, Analysis of Variance (one-way and two-way)

c) Level of significance (Non-parametric data)- Sign test, Wilcoxan's signed rank test, Wilcoxan rank sum test, Mann Whitney U test, Kruskal-Wall is test (one way ANOVA)

d) Linear regression and correlation- Introduction, Pearsonn's and Spearmann's correlation and correlation co-efficient.

e) Introduction to statistical software: SPSS, Epi Info, SAS.

2.4 Statistical methods in epidemiology

Incidence and prevalence, relative risk, attributable risk

3. Computer applications in pharmacy

Computer System in Hospital Pharmacy: Patterns of Computer use in Hospital Pharmacy – Patient record database management, Medication order entry – Drug labels and list – Intravenous solution and admixture, patient medication profiles, Inventory control, Management report & Statistics.

Computer In Community Pharmacy

Computerizing the Prescription Dispensing process

Use of Computers for Pharmaceutical Care in community pharmacy

Accounting and General ledger system

Drug Information Retrieval & Storage :

Introduction – Advantages of Computerized Literature Retrieval

Use of Computerized Retrieval

Reference books:

a. Pharmaceutical statistics- practical and clinical applications, Sanford Bolton 3rd edition, publisher Marcel Dekker Inc. NewYork.

b. Drug Information- A Guide for Pharmacists, Patrick M Malone, Karen L Kier, John E Stanovich , 3rd edition, McGraw Hill Publications 2006

BP801T. BIOSTATISITCS AND RESEARCH METHODOLOGY (Theory)

45 Hours

Scope: To understand the applications of Biostatics in Pharmacy. This subject deals with descriptive statistics, Graphics, Correlation, Regression, logistic regression Probability theory, Sampling technique, Parametric tests, Non Parametric tests, ANOVA, Introduction to Design of Experiments, Phases of Clinical trials and Observational and Experimental studies, SPSS, R and MINITAB statistical software's, analyzing the statistical data using Excel.

Objectives: Upon completion of the course the student shall be able to

- Know the operation of M.S. Excel, SPSS, R and MINITAB®, DoE (Design of Experiment)
- Know the various statistical techniques to solve statistical problems
- Appreciate statistical techniques in solving the problems.

Course content:

Unit-I **10 Hours**

Introduction: Statistics, Biostatistics, Frequency distribution

Measures of central tendency: Mean, Median, Mode- Pharmaceutical examples

Measures of dispersion: Dispersion, Range, standard deviation, Pharmaceutical problems

Correlation: Definition, Karl Pearson's coefficient of correlation, Multiple correlation - Pharmaceuticals examples

Unit-II **10 Hours**

Regression: Curve fitting by the method of least squares, fitting the lines y= a + bx and x = a + by, Multiple regression, standard error of regression– Pharmaceutical Examples

Probability: Definition of probability, Binomial distribution, Normal distribution, Poisson's distribution, properties - problems

Sample, Population, large sample, small sample, Null hypothesis, alternative hypothesis, sampling, essence of sampling, types of sampling, Error-I type, Error-II type, Standard error of mean (SEM) - Pharmaceutical examples

Parametric test: t-test(Sample, Pooled or Unpaired and Paired) , ANOVA, (One way and Two way), Least Significance difference

Unit-III **10 Hours**

Non Parametric tests: Wilcoxon Rank Sum Test, Mann-Whitney U test, Kruskal-Wallis test, Friedman Test

Introduction to Research: Need for research, Need for design of Experiments, Experiential Design Technique, plagiarism

Graphs: Histogram, Pie Chart, Cubic Graph, response surface plot, Counter Plot graph

Designing the methodology: Sample size determination and Power of a study, Report writing and presentation of data, Protocol, Cohorts studies, Observational studies, Experimental studies, Designing clinical trial, various phases.

Unit-IV **8 Hours**

Blocking and confounding system for Two-level factorials

Regression modeling: Hypothesis testing in Simple and Multiple regressionmodels

Introduction to Practical components of Industrial and Clinical Trials Problems: Statistical Analysis Using Excel, SPSS, MINITAB®, DESIGN OF EXPERIMENTS, R - Online Statistical Software's to Industrial and Clinical trial approach

Unit-V **7Hours**

Design and Analysis of experiments:

Factorial Design: Definition, 2^2, 2^3design. Advantage of factorial design

Response Surface methodology: Central composite design, Historical design, Optimization Techniques

Recommended Books (Latest edition):

1. Pharmaceutical statistics- Practical and clinical applications, Sanford Bolton, publisher Marcel Dekker Inc. NewYork.
2. Fundamental of Statistics – Himalaya Publishing House- S.C.Guptha
3. Design and Analysis of Experiments –PHI Learning Private Limited, R. Pannerselvam,
4. Design and Analysis of Experiments – Wiley Students Edition, Douglas and C. Montgomery

Ph.D. ORIENTATION PROGRAMME

PAPER – I (Research)

1. Introduction to Ph. D Programme:

Introduction to the course, course objectives, Open House Discussion, timely submission of Half yearly Reports & Synopsis submission, publication and submission of articles.

National Knowledge Commission, National Assessment and Accreditation Council (NAAC) & University Grant Commission (UGC)

2. Historical Perspectives:

Historical narration about conduct of research on human subject, Biblical times, research on vulnerable population, tackling of ethical issues in the past century. Ethical code, Nuremberg code, Helsinki declaration, Belmont principles in conduct of research in human subject.

3. Ethical Issues in Research:

Background, general principles on ethical considerations involving human participants, general ethical issues, Ethical Review Committee – need, relevance and working rules & regulations as applicable in India. Ethical Review Procedures, IRB. Principles for clinical evaluation of drugs/ devices/diagnostics/vaccines/ herbal remedies. Informed Consent Process – Preparing an informed consent for a research project.

4. Approach to Research in Health Science:

Research protocol development

Research Methodology – Defining research questions/Hypothesis, Study designs - cross sectional study, case control study and randomized clinical trials.

Clinical Trials – Introduction, composition, procedures & records, Informed consent, responsibility & rules applicable to investigators and sponsors, reporting of adverse events and other related ethical issues.

Good Clinical Practices (GCP) and safety, Good Laboratory Practices (GLP).

5. Grant Writing :

Introduction, specific aims, review of literature, measures, methodology, study plan and statistical analysis. Protection of human participants, proposed budget and time line for the proposal. Pre-Clinical Research / Translational Research

Information regarding National /International organization to avail research grants

Patents and Intellectual Property/Rights

6. Manuscript Writing:

Writing a scientific manuscript, structured writing and language editing, writing respondents & presentation, impact factor, plagiarism, bibliography, referencing & citations, **7. Critical Appraisal of Article Published in Scientific Journal**:

What is critical appraisal and why critical appraisal, present scenario of scientific publications, methodology of critical appraisal, format for critical appraisal

8. Thesis Writing:

Introduction to thesis writing, prescribed format for thesis writing, seminar presentations, preparation for Viva-Voce & communication skills.

9. Health care delivery systems in India:

National Population Policy.

National Health Policy.

National Rural Health Mission (NRHM program).

RCH program.

Current Health Problems.

Environment & health related challenges of India.

Non Communicable Diseases

Biomedical waste management

Emerging and re-emerging infectious diseases in the world and in India.

Population explosion causes and its impact.

10. Scientific Conduct

Ethics with respect to science and research Intellectual honesty and research integrity

Scientific misconducts: Falsification. Fabrication, and Plagiarism (FFP),Redundant publications: duplicate and overlapping publications, salami slicing, Selective reporting and misrepresentation of data

Legal aspects of research

11. Publication Ethics

Publication ethics definition, introduction and importance

Best practices/ standards setting initiatives and guidelines: COPE, WAME, etc.

Conflicts of interest, Publication misconduct: definition, concept. problems that lead to unethical behaviour and vice versa, types, Violation of publication ethics, authorship and contributor shipIdentification of publication misconduct, complaints and appeals, Predatory publishers and journals

12 Open Access Publishing

Open access publications and initiatives, SHERPA/ROMEO online resource to check policies publisher copyright & self-archiving

Software tool to identify predatory publications developed by SPPU Journal finder /journal suggestion tools viz. JANE, Elsevier Journal Finder, Springer Journal Suggester, etc.

Critical appraisal of published literature

13.Publication Misconduct

Subject specific ethical issues, FFP, authorship, Conflicts of interest, Complaints and appeals: examples and fraud from India and abroad

Use of plagiarism software like Turnitin, Urkund and other open source software tools

14. Databases And Research Metrics

Databases : Indexing databases, Citation databases: Web of Science. Scopus, etc.

Impact Factor of journal as per Journal Citation Report. SNIP, SJR, IPP, CiteScore

Metrics: h-index, g index, il0 index, altrmetrics

15. Online Certificate Course on "Health Research Fundamental" by ICMR:

16. Attending Ph.D. 6-monthly presentations: (Atleast 25 presentations)

17. Visit to Regional Medical Research Centre (RMRC), Belagavi:

18. Visit to Basic Science Research Centre (BSRC):

19. Library Hours for Self Study:

Paper II (Syllabus related to Research Discipline)

Theory: 60 hrs (*Credits: 2*); Practicals: 120 hrs (*Credits: 2*)

1. Topics related to research discipline:

The paper II shall be on the topics related to the research discipline of the candidate and the research supervisors are required to submit the detailed syllabus to the Office of the Academic Affairs within three months of the registration of the candidate.

2. Attending Discipline-related Workshops/CMEs/Seminars/Conferences:

3. Attending Ph.D. Open House Seminars: (Atleast 15)

4. Attending Ph.D. Open Defence Viva: (Atleast 15)

Paper III (Biostatistics)

1. Introduction to Bio-statistics, translating research problem into hypothesis, hypothesis testing, Type I & Type II errors in statistics, checking errors in data and correcting them.

2. Sample size calculation for different study designs.

3. Types of variables and types of data measurements scales, Data Collection methods, presentation & organization of data – Tabular / Graphical Form.

4. Sampling Designs, Descriptive Statistics - Measures of central tendency & measures of dispersion, Correlation Analysis, Regression Analysis, Probability Theory - Binominal distribution, Poisson distribution, normal distribution, concept of testing of hypothesis.

5. Test of Significance- Parametric tests-Z test, T test, ANOVA and Non Parametric tests- Chi-Square test, Wilcoxson Rank test, Kruskal Wallis test.

6. Devising conclusion from data analysis.

7. Use of computers, statistical software's, data cleaning.

KLE ACADEMY OF HIGHER EDUCATION & RESEARCH, BELAGAVI

KLE College of Pharmacy

(Re-Accredited by NAAC, NBA – AICTE,PCI New Delhi)

[Declared as Deemed-to-be-University under section 3 of the UGC Act, 1956 vide Government of India Notification No. F.9-19/2000-U.3(A)]

P.B.No. 1062, 2nd Block, Rajajinagar, Bengaluru - 560 010, Karnataka, India.

☎ 080-23325611 FAX No.: 080-23425373 Web :http://www.kleblrpharm.orgE-mail:princpharmblr@kledeemeduniversity.edu.in

RESEARCH METHODOLOGY WITH COURSE ON RESEARCH ETHICS

KLE College of Pharmacy, Bengaluru is committed to academic and research excellence, offering undergraduate, postgraduate and Ph.D. programmes. The faculty members are actively involved in various research activities. The Institution with a view to promote and encourage research, provides good infrastructure for conduct of research with total space area of 1,821.43sq.ft. which includes Basic Science Research Centre (BSRC), Animal house, Herbal garden and Pilot plant.

The Institutional follows Research ethics, by providing guideline for the responsible conduct of research. In addition, it educates and monitors faculties and research scholars to ensure high ethical standards in research.

The following are the ethical principles in research methodology:-

1. To ensure that no fabrication/misrepresentation of report data, results, methods and procedures and publication status of research work.
2. Strive to avoid bias in experimental design, data analysis, data interpretation, peer review, personnel decisions, grant writing and other aspects of research.
3. Critical examination of research activities to avoid errors.
4. To respect Intellectual properties and never plagiarize.
5. Protect confidential communications, such as papers or grants submitted for publication.
6. To obey relevant Institutional rules and Government policies.
7. To conduct animal experimentations as per guidelines framed by institutional ethical committee.
8. To make research a significant activity involving staff, students and society.

RESEARCH METHODOLOGY WORKSHOP FOR INTERNS REGULAR BATCH 2023 – 24

Resource person for the workshop:

Sl. No	Topic	Staff Alloted	Time
1.	Framing the title of research proposal/ protocol Overview of IJPTR	Dr. Santosh Metgud Dr. Pamela D'silva	9:15am – 9:45am
2.	Framing a research question and hypothesis	Dr. Apeksha Hungund	9:45am – 10:00am
3.	Sampling Design	Dr. Varsha Huddar	10:00am – 10:30am
4.	Review of Literature	Dr. Anand Hegganavar	10:30am – 11:00am
5.	Outcome measures in physiotherapy	Dr. Mehreen Bandmaster	11:00am – 11:30am
6.	Informed consent	Dr. Renu Pattanshetty	11:30am – 12:00pm
7.	Research design	Dr. Aarti Welling	12:00pm – 12:30 pm
8.	Contents of synopsis writing	Dr. Vinuta Deshpande	12:30 pm – 1:00pm
LUNCH BREAK			
9.	Data collection	Dr. Deepti Bagewadi	2:30pm – 3:00pm
10.	Data analysis and overview of SPSS software	Dr. Sushil Kumar	3:00pm – 3:30pm
11.	Contents of Manuscript writing	Dr. Arati Mahishale	3:30pm – 4:00pm
12.	Reference writing	Dr. Dhaval Chivate	4:00pm – 4:30pm

RESEARCH METHODOLOGY WORKSHOP REPORT

KAHER Institute of Physiotherapy's Research and Development Committee organized Research methodology workshop for Interns regular batch 2023 – 24 on 17th October 2023 from 9:00am – 5:00pm. Topics like, Framing the title of research proposal, framing a research question, hypothesis, research design, sampling design, review of literature, outcome measures in physiotherapy, informed consent, data collection, data analysis, overview of SPSS software, contents of synopsis writing, contents of manuscript writing and reference writing were covered in the one day workshop. The workshop was well appreciated by all the 84 delegates and expressed that the topics covered would help them in their course work for intern research project. The workshop was organized under the guidance of Dr. Sanjiv Kumar, Principal, Dr. Deepa Metgud, Dean and Incharge, Dr. Santosh Metgud, Professor and member, and Dr. Apeksha Hungund, Assistant Professor and member, Institutional Research and Development Committee.

KLE ACADEMY OF HIGHER EDUCATION & RESEARCH INSTITUTE OF PHYSIOTHERAPY ★ BELAGAVI

Principal

RESEARCH METHODOLOGY AND ETHICS, EVIDENCE BASED PHYSIOTHERAPY (SUBJECT CODE: 1124)

Teaching Hours: 70 hours (Theory: 70 hours)

Maximum Marks: 100 (Theory: 100)

Assessment: Written, Internal and University examination.

Internal Examination: 20 marks Theory University Examination: 80 marks Theory

Objectives: On successful completion of this unit, it is expected that students will be able to understand basic research methodology and ethics in physiotherapy. The objectives are to develop an understanding about evidence based physiotherapy and its applications.

Course Outcome:

At the completion of the course students will be able to:

3.5.1	Develop an understanding of the basic concepts of research methodology & basic biostatistics
3.5.2	Develop an understanding of the application of research methodology principles to Physiotherapy research
3.5.3	Develop an understanding of the historical aspects & basic concepts of research & Human ethics
3.5.4	Develop an understanding of the importance & application of ethical principles in Physiotherapy research & clinical practice
3.5.5	Develop an understanding of the basic concepts of evidence based practice & its role/importance in Physiotherapy research & clinical practice

Note: Long question and MCQs should be asked only from "Must Know" and Short Essay and Short Answers from "Must Know" and "Good to Know".

80% of Questions in the university exam will be included from must know content 15% from desirable to know and 5% from nice to know

1. RESEARCH METHODOLOGY

6. **Research variables (GOOD TO KNOW)**
   - Introduction
   - Types
   - Reliability and validity
   - Specificity and sensitivity
7. **Pilot study and pre-testing (NICE TO KNOW)**
   - Need
   - Advantages
8. **Data collection (MUST KNOW)**
   - Introduction
   - Sources
   - Methods
   - Types
9. **Biostatistics (MUST KNOW)**
   - Introduction of biostatistics (tabulation, graphical presentation)
   - Measures of central tendency, variation, location, association and correlation for qualitative and quantitative data, bivariate distribution.
   - Probability theory, normal, binomial and Poisson distributions
   - Sampling methods and sample size estimation
   - Simple regression analysis, Multivariate analysis; concepts and interpretation, Logistic regression analysis; concepts and interpretation
   - Concepts in generalization of statistics computed from a sample and the utilities in research, including tests for significance.
10. **Research report (NICE TO KNOW)**
    - Introduction
    - Types
    - Publication

II. ETHICS

- Introduction, History & General Principles of ethics involving human participants **(NICE TO KNOW)**
- Ethical consideration in physiotherapy practice- State, National & international rules & regulations governing physiotherapy practice **(GOOD TO KNOW)**
- Informed consent process **(MUST KNOW)**
- Good clinical practices (GCP) **(MUST KNOW)**
- Ethical codes and conduct for physiotherapy profession**(GOOD TO KNOW)**
- Influence of values & valuing on patient care **(NICE TO KNOW)**
- Documentation skills- History, examination, treatment planning, organization & execution **(NICE TO KNOW)**

III. EVIDENCE BASED PHYSIOTHERAPY

Introduction to Evidence Based Practice: (GOOD TO KNOW)

- Definition
- Development of Evidence based knowledge **(NICE TO KNOW)**
- Evidence Based Physiotherapy Practice **(MUST KNOW)**
- Evidence Based Practitioner: The Reflective Practitioner, The E Model, Using the E Model **(GOOD TO KNOW)**
- Concepts of Evidence based Physiotherapy: Awareness, Consultation, Judgment, Creativity **(GOOD TO KNOW)**

Finding the Evidence (MUST KNOW)

- Measuring outcomes in Evidence Based Practice
- Measuring Health Outcomes
- Measuring clinical outcomes **(GOOD TO KNOW)**
- Inferential statistics and Causation **(NICE TO KNOW)**

Searching for the Evidence (MUST KNOW)

- Different sources of evidence ,Electronic **(GOOD TO KNOW)**
- Bibliographic databases **(NICE TO KNOW)**

- World Wide Web (NICE TO KNOW)
- Literature search(MUST KNOW)

3. **Assessing the Evidence (MUST KNOW)**
   - Evaluating the evidence
   - Levels of evidence in research using quantitative methods
   - Levels of evidence classification system
   - critical review of research using qualitative methods
4. **Reviewing the evidence (GOOD TO KNOW)**
   - Stages of systematic reviews **(GOOD TO KNOW)**
   - Meta-analysis **(NICE TO KNOW)**
   - The Cochrane collaboration **(NICE TO KNOW)**
5. **Economic evaluation of the evidence (GOOD TO KNOW)**

   Types of economic evaluation

   Conducting economic evaluation
   - Critically reviewing economic evaluation
   - Locating economic evaluation in the literature

6. ***Practice guidelines*: (NICE TO KNOW)**
   - Recent trends in health care
   - Clinical Practice Guidelines (CPG)
   - Communicating evidence to clients, managers and funders

Research dissemination and transfer of knowledge (NICE TO KNOW)

Evidence-Based Practice in Nursing and Health Care: A Guide to Best Practice, by Bernadette

Melnyk (Editor), Ellen Fineout-Overholt (Editor)

Evidence-Based Rehabilitation: A Guide to Practice,by Mary Law

Achieving Evidence-Based Practice, by Susan Hamer, BA, MA, RGN, FETC(DIST),

The Evidence-Based, Randy A Haye

Section III

1st Year Common Subjects to all specialties

Content:

TITLE OF THE PAPER I: PAPER-I PHYSIOTHERAPY EDUCATION, RESEARCH, BIOSTATISTICS & ETHICS	
Duration : 0-12 Months	Max Marks = 100
Teaching Scheme	
Theory : 150 hrs.	
Practical 250 hrs.	
Distribution of marks – Research 50 marks, Ethics 30 marks , Physiotherapy Education 20 marks	
Course Descriptions	

RESEARCH & BIOSTATISTICS

Content	Hours
1. Principles of Research	02
2. Review of scientific methods.	02
3. Research question, Research Design, Quantitative and Qualitative Research Paradigms.	05
4. Sampling design, Data sampling and methods of data collection, Probability	04
5. Measurement &Scaling Techniques.	03
6. Introduction to Biostatistics	02
7. Source and presentation of Data	05
8. Measures of Location, Average and Percentile	03
9. Measures of Central Tendency	03
10. Variability and its measures	05
11. Normal Distribution and Normal Curve	04
12. Demography Study	03
13. Measures of Population and Statistics	03
14. Data analysis: Descriptive and Inferential Statistics, Correlations and Hypothesis Testing.	08
15. Quantitative Data Analysis: Revision of Descriptive and Inferential Statistics, Correlations and Hypothesis Testing, General Linear Model, Power and Effect.	08

16. Analysis of Variance and Covariance Multivariate Designs, Nonparametric Data Analysis and Selection of Nonparametric Tests.	10
17. Qualitative Data Analysis: Major Qualitative Methodologies, Techniques in Data Collection and Analysis.	10
18. Role of Technology in Research.	03
19. Protocol writing, Manuscript writing and Grant writing	06
ETHICS	
1. Introduction, History & General Principles of ethics involving human participants.	02
2. Ethical consideration in physiotherapy practice- State, National & international rules & regulations governing physiotherapy practice.	06
3. Ethical review procedures- Protocol Writing, Ethical Committee.	06
4. Informed Consent Process	03
5. Plagiarism	03
6. Good Clinical Practices (GCP)	04
7. Ethical codes and conduct for physiotherapy profession.	04
8. Documentation skills- History, examination, treatment planning, organization & execution.	05
PHYSIOTHERAPY EDUCATION	
1.Education – Formal and Non-Formal – Philosophy of Health Education, Aims, Philosophy and Trend and Issues In Education Including – Aims, Agencies, Philosophies of Education (Modern and Contemporary) Philosophies of Education In India – Past, Present and Future Current Issues and Trends in Education	05
2.Concepts of teaching and learning – theories of teaching, relation between teaching and learning, dynamics of behavior, learning perception, individual differences, intelligence and personality .	05

3. Principles and methods of teaching – strategies and planning, organization and teaching methods - micro teaching, socialized teaching method.	05
4.Teaching technology - Traditional and newer trends in teaching learning methods, interactive learning, clinical teaching, methods of assessment of student competencies	03
5. Curriculum formation – committee framing, development & types of curriculum, formation of philosophy & course objectives, Placing, master plans of courses, Clinical assignments ·Current trends and curriculum plan	05
8.Measurement& evaluation- standardized & non standardized tests, steps of constructing a test measurement, measurement of cognitive domain, assessment techniques of effective psychomotor domains, administrating, scanning and reporting standard tools, important test of intelligence, aptitude, Instrument, personality, achievement, and status scale, program evaluation	05
