MEMORANDUM OF UNDERSTANDING

PART I

KLE Society's Jagadguru Tontadarya College affiliated to Karnataka University Dharwad was established in the year 1958 with the holiness of Shri Jagadguru Tontadarya Swamiji. The Department of Chemistry is well equipped with all the technologies. Our commitment is to provide the quality education, trying to mould the young minds to exhibit their skills & talents. To achieve this goal we have undertaken different projects, Industrial visits, seminars, workshops, experimental learning etc. Students are also interestingly participating and responding very enthusiastically. The major objective to sign MOU is to create research and projects interest in our students and to explore their ideas practically. Here after called as Part I.

ATTESTED

PART II

ABOUT US KLE's College of Pharmacy (A constituent unit of KLE Academy of Higher Education and Research, Belagavi): Formally commenced its courses in 1985. Located on Poona-Bangalore highway, in a picturesque campus, the college has every possible amenity required to impart professional education. The institute offers D.Pharm, B.Pharm, M.Pharm, Pharm.D & Ph. D courses. B.Pharm course is reaccredited by NBA with effect from 31.10.2019.

Our college is one amongst the many successful ventures of K.L.E. Society, which has a reputation for pioneering in pursuit of academic excellence. Our college has achieved laurels worthy of creators and it is continuously striving for higher ground.

It has gained appreciation from the top recognizing centers in India like: Pharmacy Council of India, All India Council for Technical Education and Government of Karnataka. We have series of courses aimed at developing the best of pharma professionals.

We aim at Pharmaceutical Sciences Research that helps the communities. Proactively we work on the identification and resolving drug related problems. We work on Continuous quality improvement techniques to optimize the medication process. A host of amenities are made available for academic pursuers and researchers. Ideally located college and hostels help to foster a conducive atmosphere for studies.

PURPOSE/OBJECTIVE/GOALS

1. This MOU is to strengthen the research interest in our students and to expertise them in research activities.
2. Links to higher educational resources.
3. Promoting and facilitating Practical knowledge and to create entrepreneurship activities.
4. To carry out Projects/ Dissertations / Field Studies/ Coarse Projects in the field of formulations, bioactive synthetic and natural chemicals and bioactive studies.
5. To foster and disseminate High Quality Research and creative work which enhances Learning and contributes to the advancement of Knowledge.
6. To promote the Research which is of relevance to Industry and Commerce, which contributes to the Society.
7. To link the Chemical science with Pharmaceutical sciences and to ensure the safe, effective and affordable use of drugs.

The institutions will both together mutually decide upon terms and conditions for implementation of the above tasks.

We re-affirm our commitment to the program and our willingness to make a consistent effort to ensure that it is implemented effectively in Institutions.

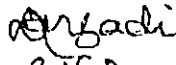

The Memorandum is in force effective from this date till five years.

Dr. Sanjay Shinde

Phd Nursing

College of Health and Medical Sciences, (BIU), Ethiopia.

Addressed on: Cross Sectional Design

Uses II: Determinants of health and disease

- The aim is what causal factors or correlates are active in the specific community and to measure their impact.
- The primary aim is not to generate new knowledge about etiology
- Eg: Association of sleep duration with socioeconomic status and behavioural problems among school children.

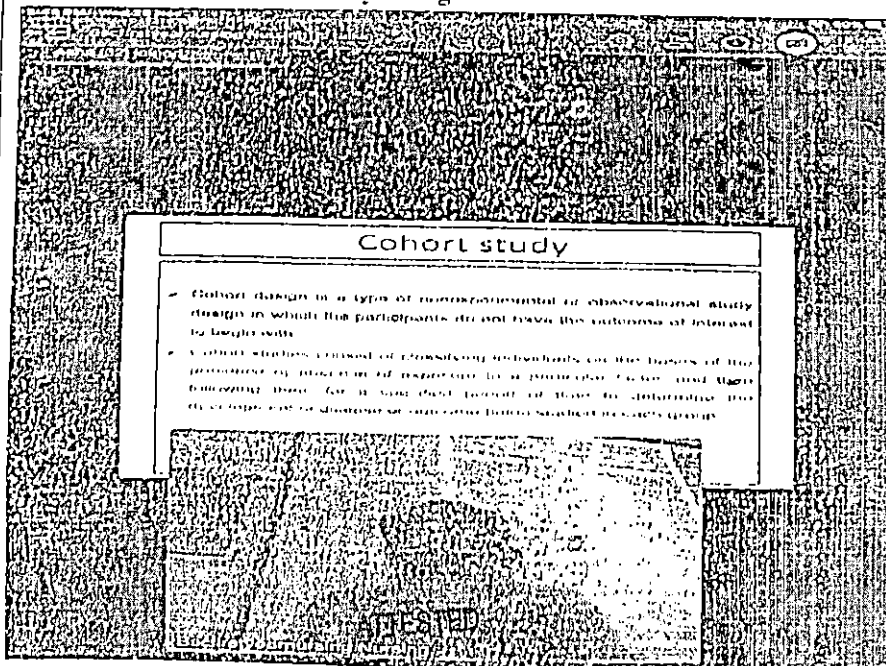

2.30-3.15pm

Mr. Gavi Salimath

Associate professor

Department of Child Health Nursing KAHER INS Belagavi.

Addressed on: Cohort Study Design

Cohort study

- Cohort design is a type of longitudinal or observational study design in which the participants are not those of interest to begin with.
- Cohort studies consist of following individuals on the basis of the presence or absence of exposure to a particular factor and then following them for a long period of time to determine the risk of exposure to disease or other factors based on each group.

Standing Committee On Professional Exchange
Medical Students Association of India

Official Selection Letter

MSAI/SCOPE/2018/0144

29th November, 2018

To whomsoever it may concern,

This is to confirm that the following student is selected to participate in our bilateral medical student exchange program:

NAME OF STUDENT: **UMA GUPTA**
SEX: **FEMALE**
NATIONALITY: **INDIAN**

Medical Students Association of India (MSAI) in collaboration with our counterpart organization of the host country, will arrange for a medical clerkship at one of the universities or affiliated hospitals for four weeks for the student. They will be provided accommodation and at least one meal per day at no extra cost. They will be placed under the supervision of a chief doctor at the department and will not receive any salary. The student is expected to resume their undergraduate medical studies after returning from the stated period of clerkship.

HOST COUNTRY: **MEXICO**
HOST ORGANISATION: **AMMEF**
PERIOD: **JUNE 2019**

Medical student association of India (MSAI) is a non-government organization run for and by Indian medical students, who provide their services on a voluntary basis. It was founded in October 2011. MSAI-India is a registered society dedicated to work for medical students' welfare across the country. MSAI is also the National Member Organization (NMO) of the International Federation of Medical Students Association (IFMSA), which is the world's largest student organization representing more than 1.3 million medical students worldwide. It is also a non-government organization which is the main organization making this exchange possible with the help of its Standing Committee On Professional Exchanges (SCOPE).

We urge all authorities to be co-operative and helpful in order for this medical student to acquire a visa for the arranged clerkship and within a reasonable time.

I remain available for any clarification or further information regarding the student's clerkship. Confident in your understanding, I send my best regards and gratitude in advance.

Yours sincerely,

Date:17.12.2019

The Principal
Institute of Physiotherapy
KLE Academy of Higher Education and Research
JNMC Campus, Nehru Nagar
Belagavi – 590 010.

Sir/Madam,

Sub: Request for Permission to undergo training at this institute – reg.
Ref: Your letter dated 03.12.2019

With reference to the above, I am directed to convey the permission of the Competent Authority for the students of your Institution to undergo training at this Institution as follows:

1	Number of trainees	07
2	Name of the trainees	Ms. Damani Radhika Raj and 06 others
3	Department at which training permitted	Physiotherapy Section
4	Date & Duration of training	01.03.2020 to 31.03.2020
5	Training fee	Rs.2000/- per month or part thereof per trainee

- The trainees should compulsorily carry their college ID cards while posted at NIMHANS.
- One stamp size photo should be given at the time of joining for issue of temporary ID card. (ID card should be returned at the end of training without fail)
- Trainees should carry a copy of this letter without fail.
- The training fee for the whole duration of training has to be paid by Debit/Credit Card on the day of joining. The training fee once paid will not be refunded.

I am also directed to inform you that the visiting students/trainees should make their own arrangement for accommodation. However all efforts will be made to provide hostel accommodation, but this will be subject to availability, based on Manager, Hostel report (080-26995095)/Supervisor, Cauvery Hostel, (080-26995092) as on the date of joining and on payment of charges as below, Accommodation will not be provided to the candidates coming earlier than the scheduled date of observership.

1. Hostel Rent: Rs.100/- per day

NOTE: In case of any damage of assets/property in the Hostels i.e., movable and immovable property of NIMHANS by the trainees, the college shall be directly responsible for such act of the trainees. The loss incurred has to be borne by the Institution/College deputed the trainees. Further, the attendance certificate for training of such trainees will be withheld.

On arrival, the trainees must contact the undersigned for further needful.

Yours faithfully

The KLE Academy of Higher Education and Research (KAHER), Belagavi, Karnataka, India and Vijaya ENT Care Centre Super-Specialty Otolaryngology Centre, Bengaluru recognize the benefits to their respective Institute / Centre from the establishment of collaborations and proceed to have a Memorandum of Understanding (MoU). Both the independent institution / centre are committed to mutual and common goals of generating new knowledge towards academic collaborations in Otolaryngology and Micro-Ear Surgery.

PREAMBLE:

KLE Society established in the year 1916 is successfully running more than 255 institutions in the field of healthcare (Medical, Dental, Pharmacy, Ayurveda, Physiotherapy and Nursing Science), Information Technology, Law and many more conventional and non-conventional disciplines. Currently, the KLE University has been accredited with 'A' Grade by National Assessment and Accreditation Council (NAAC) in the 2nd Cycle and has been placed in Category 'A' by the Ministry of Human Resource Development (MHRD), Government of India.

Vijaya ENT Care Centre Super-Specialty Otolaryngology Centre, having its Centre at #1, 9th Cross, Malleshwaram Bangalore-560 003 caters to the needs of Post-Graduate students of ENT and Fellowship in Micro-Ear Surgery through advanced training program / practical aspects.

The respective University / Centre jointly recognize this MoU to mutually cooperate in the areas of advanced training and practical exposure in the field of Micro-Ear Surgery and Otolaryngology for the benefit of Post-Graduate students of ENT of J.N.Medical College, Belagavi, a constituent unit of the KLE University.

ATTESTED

Dr. V.A.Kothiwale
Registrar

KLE Academy of Higher Education and Research,
(Deemed-to-be-University u/s 3 of the UGC Act, 1956)
Belagavi-590 010, Karnataka

PURPOSE / OBJECTIVE

The primary purpose of this MoU is to build academic research / training capacity including research publications and to promote mutual understanding between the University /Centre. The MoU shall formally set out the terms of co-operative relationship between the parties, establish their respective roles, and facilitate the function of each party in relation to collaborative research / academic training.

Both University / Centre agree to develop collaborative activities in academic areas of mutual interest / advanced practical training and as equal partners with reciprocity. All academic and research training events are expected to reflect the Post-Graduate students and faculty members in the area of Micro-Ear Surgery, Otology and research publications particularly in the area of ENT and HNS.

The development and implementation of specific activities based on this MoU shall be negotiated and agreed upon with mutually accepted terms and conditions.

This MOU is agreed on the basis of cooperation between the University/Centre includes the following:

- A. The University and the Centre desire to provide training /education /academic collaboration for Fellowship Program in Micro-Ear Surgery every year and research publications.
- B. The KLE University will depute Post Graduate-students and Fellowship students of Micro-Ear Surgery as decided by the University for the Fellowship Program every year at the Collaborator Centre.
- C. Both the institutes will be jointly conducting clinical research and make national and international scientific /research publications together.
- D. HOD of ENT in the University's J.N.Medical College, Belagavi shall be the Officer Incharge for this collaboration with the Collaborator institute.

TERMS OF AGREEMENT

Both University / Centre agree to carry out the above mentioned activities in accordance with laws and regulations of respective university/centre after full consultation and approvals.

The term of this agreement shall be valid for a period of five years commencing from the date of signature hereof. This agreement can be extended for further terms on mutual agreement. This agreement may be terminated by giving 6 months prior notice from either parties.

In witness whereof, the parties have executed this document by signing on the day of 2nd November 2018.

Sub: Re-posting of Ayurveda Oncology Fellowship Scholars - reg.

Ref: Our office letter No. BMK/51/19-20 dated 20-8-2019.

Dear Sir,

As per your email communication dated on 20-8-2019 regarding re-posting of Ayurveda Oncology fellowship scholars, we are thankful to you and extend our gratitude for extending clinical assistance to these fellowship scholars which will enhance the clinical acumen and helping in creating human resource to serve cancer patients. We are posting the following scholars for a period of two months from 1-2-2020 to 31-3-2020.

1. Dr Lima Mathew MD [2018 Batch]
2. Dr Peeyush Kaushik MD [2019 Batch]

Thanking you,

Subject: Internship Completion Letter

We are glad to inform that Ms. Archana Kumari Gupta from J.N Medical College, KAHER has successfully completed 2 months internship at Health Section of Damak Municipality from March 15th, 2020 to May 15th, 2020.

During her internship, she has closely worked with us as our health sector team. Her contribution throughout this period was on prevention, control and management of pandemic by daily follow up of high risk and suspected cases came from abroad, recording and reporting of COVID 19; support on ensuring the implementation of Safe motherhood program at different hospitals under the Municipality.

We found her extremely inquisitive, cooperative and hard working. She was very much interested to learn the function of our section and also willing to put her best efforts and get into the depth of subject to understand it better.

We wish her all the best for future endeavors.

EXPERIENCE CERTIFICATE

TO WHOM-SO-EVER IT MAY CONCERN

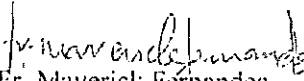

It is our pleasure to certify that Ms. Stella Fernandes did her internship with Caritas Goa CHILDLINE (North Collaborative Organization) from 16th March 2020 to 16th May 2020.

CHILDLINE is a National 24 hour emergency toll free telephone helpline service for all children in need of care and protection. It is a project of the Ministry of Women and Child Development in collaboration with State Governments, NGOs, allied systems, corporate sector, concerned individuals and children.

During this period, she was involved in the outreach services of providing groceries and other provisions to the needy and migrant families with children. She was engaged in responding to calls on 1098 and reporting to the Center Coordinator. She attended the weekly meetings of Childline.

Besides, she gave COVID -19 awareness sessions for the students of Home Nursing and also for special children from ASRO, Community Home for children with HIV/AIDS.

We wish her all the best in her future endeavours.

SHOOWREDMIRZO

APOLLO HOSPITALS ENTERPRISE LIMITED

5. You will be entitled to twelve days casual leave and twelve days sick leave for every period of twelve months. Leave should be awarded only on prior sanction of the head of the department. Leave for incomplete year of service will be determined on a pro-rata basis.

6. During the course of your employment with the company you should not accept directly or indirectly any part-time job or transact any business. Your appointment is liable to be terminated with immediate effect, if this understanding is violated.

7. You will observe working hours relevant to the department you are placed in.

8. You will report for work punctually at the appointed time after duty recording attendance. Failure to record attendance to the register provided for the purpose will be treated as unauthorised absence from duty, rendering you liable for appropriate disciplinary action, and salary deduction.

9. Late coming is liable for a proportionate deduction in the day's wage. Reporting late for work more than a month is considered habitual late coming and is liable for appropriate disciplinary action.

10. You are required to be at your work spot during working hours during which you will be treated as absent and subjected to disciplinary action.

11. Permission to leave the premises of the organization during working hours should be authorized by the departmental head. Leaving premises without permission will be treated as absence for the whole day rendering you liable for disciplinary action, in addition to a salary deduction.

12. Unauthorized absence for eight consecutive days will be construed as voluntary abandonment of the company's employment.

13. The company at any time may require you to be examined by the Casualty Medical Officer of Apollo Hospitals. If on such examination you are found to be suffering from any infectious disease or any mental illness or any ailment or illness or its treatment which required frequent absence from work, your services will be terminated with one month's notice or payment in lieu thereof.

14. Any change in residential address should be intimated to the Human Resources Department immediately.

Antimicrobial efficacy of *Trachyspermum ammi* (Ajwain), *Acacia catechu* and *Pongamia pinnata* against *E. faecalis* as an intracanal irrigant: An *in vitro* comparison.

Introduction-

A complete elimination of the microorganisms is essential for a successful endodontic treatment. *E. faecalis*, a gram positive anaerobic bacteria is most commonly documented in the periapical infections and failed endodontic treatments.

Intracanal irrigation is one of the important protocols in root canal treatment to eliminate microorganisms. Various solutions are used as irrigants, of which Sodium Hypochlorite is a gold standard. But, it has some disadvantages such as tissue toxicity, bad taste and sometimes has allergic potential. Therefore a search for alternative antimicrobial agents is pursued. The effect of different plant extracts as an antimicrobial agent have shown promising results towards variety of species of bacteria.

The advantages of using plant extracts as an antimicrobial agents are:

- Fewer side effects
- Better patient tolerance
- Cost effective

In the present study we have chosen the extract of *Trachyspermum ammi* (Ajwain), *Acacia catechu* and *Pongamia pinnata* as a root canal irrigant.

Trachyspermum ammi seeds contain 50% thymol and camphor which is reported to have antimicrobial activity against bacteria. *Acacia Catechu* is a medicinal plant which is used for different purposes. The bark of the plant acts as a strong antioxidant, anti-inflammatory and antimicrobial agent. *Pongamia Pinnata* stem extracts have also shown anti-inflammatory and antimicrobial activities.

AIM-

To evaluate and compare the antimicrobial efficacy of *Trachyspermum ammi* (Ajwain), *Acacia catechu* and *Pongamia pinnata* against *E. faecalis* as an intracanal irrigant.

Identification of potent natural compounds in targeting *Leishmania major* CYP51 and GP63 proteins using a high-throughput computationally enhanced screening

Deepak A. Yaraguppi¹, Sanjay H. Deshpande^{1,2*}, Zabin K. Bagewadi¹, Uday Muddapur¹, Sushil Anand³ and Santosh B. Patil⁴

Abstract

Background: Leishmaniasis is a disease caused by protozoan forms called *Leishmania* which infect animals and humans. The drugs have been in use since half a century due to which there have been mutations in the microbe-facilitating drug resistance. So this provides a reason for searching for effective drugs for the disease. In the current work, an effort has been to find such drugs that act on disease-relevant receptors by similarity indexing method, molecular docking, and dynamics studies. The study focused on the rapid expansion of potential anti-leishmanial compounds that could function as novel natural compound structures for future drug

Results: Similarity indexing of existing drugs with natural compounds using Janimoto clustering resulted in 4 compounds with similarity index of greater than 0.7 (70% similarity). The molecular docking of the resulted compounds was carried out with therapeutic targets CYP51 and GP63 proteins. N-methyltyrosyl-N-methyltyrosyl-leucyl-alanine from *Streptomyces griseus* showed higher binding affinity in comparison to inhibitor and other selected natural compounds. Simulation studies revealed that the binding configuration of the compound with targets was highly stable all through 10 ns of simulation time with intact hydrogen bonding.

Conclusions: The molecular docking and molecular dynamics studies for the selected natural bioactive compound N-methyltyrosyl-N-methyltyrosyl-leucyl-alanine from *Streptomyces griseus* showed better binding affinity with the selected therapeutics targets and can be further considered for in vitro and in vivo studies which may lead to a possible new drug for the treatment of Leishmaniasis.

Keywords: Leishmaniasis, Similarity indexing, Molecular docking, Drug design, Natural compounds

Background

Leishmaniasis is a disease caused by protozoan genera *Leishmania*. It is transmitted to humans by the bite of certain species of sand fly (subfamily Phlebotominae). It is transmitted through zoonosis and human infection is

caused by about 21 of 30 species that infect mammals. These include the *L. donovani* complex with three species (*L. donovani*, *L. infantum*, and *L. chagasi*); the *L. mexicana* complex with four main species (*L. mexicana*, *L. amazonensis*, and *L. venezuelensis*); *L. tropica*; *L. major*; *L. aethiopica*; and the subgenus *Viannia* with four main species (*L. (V.) braziliensis*, *L. (V.) guyanensis*, *L. (V.) panamensis*, and *L. (V.) peruviana*). Leishmaniasis is an endemic in more than 85 countries with more than 1.5 million estimated cases occurring each year and an additional 350 million people at risk of infection [1]. The life cycle of the

Leishmaniasis is given in figure (Fig. 1) [2]. The severity of disease ranges from minor lesions that may heal in few months to years to highly severe lesions leading to death of the person if left untreated. The annual incidence is estimated to be 500,000 cases, with 50% occurring in India. The disease is endemic in the eastern States of Bihar, Jharkhand, Uttar Pradesh, and West Bengal. In these states, it is marginalized communities living in rural poverty who bear the greatest disease burden [3].

Leishmaniasis is transmitted by the bite of infected female *Phlebotomine* sand-flies. The sand-flies inject the infective stage (i.e., promastigotes) from their proboscis during blood meals. Promastigotes that reach the puncture wound are phagocytized by macrophages and other types of mononuclear phagocytic cells. These organisms inhibit the microbicidal activity of host macrophages, thus passing through the adaptive and innate immune responses of our body. Further, in the promastigote stage engulfed by macrophages with the help of C3b receptors, they resist proteolysis and degradation in the phagosome. These organisms have special surface glycoprotein called GP 63 which converts C3b into iC3b8 which allows phagocytic clearance.

The phagocytic protection includes protection from oxidative. By living inside the macrophages, it resists the humoral branch of the immune system [4].

Strategies to find a new compound from a natural source is carried out based on the tanimoto similarity indexing method and the most similar compound to the already established inhibitor of GP63 protein. Further, in silico studies provide an insight on the possible interaction of natural compounds with GP63 and CYP51 protein [5].

Methods

Protein structures and compound database

Protein sequence and structure was downloaded from Uniprot [6] and PDB database [7], respectively. The Uniprot id of Leishmanolysin protein is P23223 [6], the gene name is GP63, and the structure of the protein was modeled using RaptorX server [8] (Fig. 2a) and Lanosterol 14-alpha demethylase is C5WML [6], gene id is CYP51, pdb id of CYP51 is 3L4 D[9] (Fig. 2b), the and sequence and structure were downloaded from Uniprot website [6] and PDB website [7].

 Belagavi-590 010,Karnataka

The inhibitors for GP63 protein were identified based on literature and other *in silico* methods.

The 3D structure of the inhibitor benzyloxycarbonyl-Tyr-Leu-NHOH [10] was downloaded from PubChem database. [11]. The Natural compound database was downloaded from UNPD [12] and stored in sdf format (Fig. 3).

Similarity indexing

Similarity indexing method using tanimoto clustering is one of the widely used method to calculate similarity coefficient based on atom fingerprints in compounds. The Similarity indexing was carried out using R programming [13] and ChemmineR package [14] using R studio interface.

Molecular docking

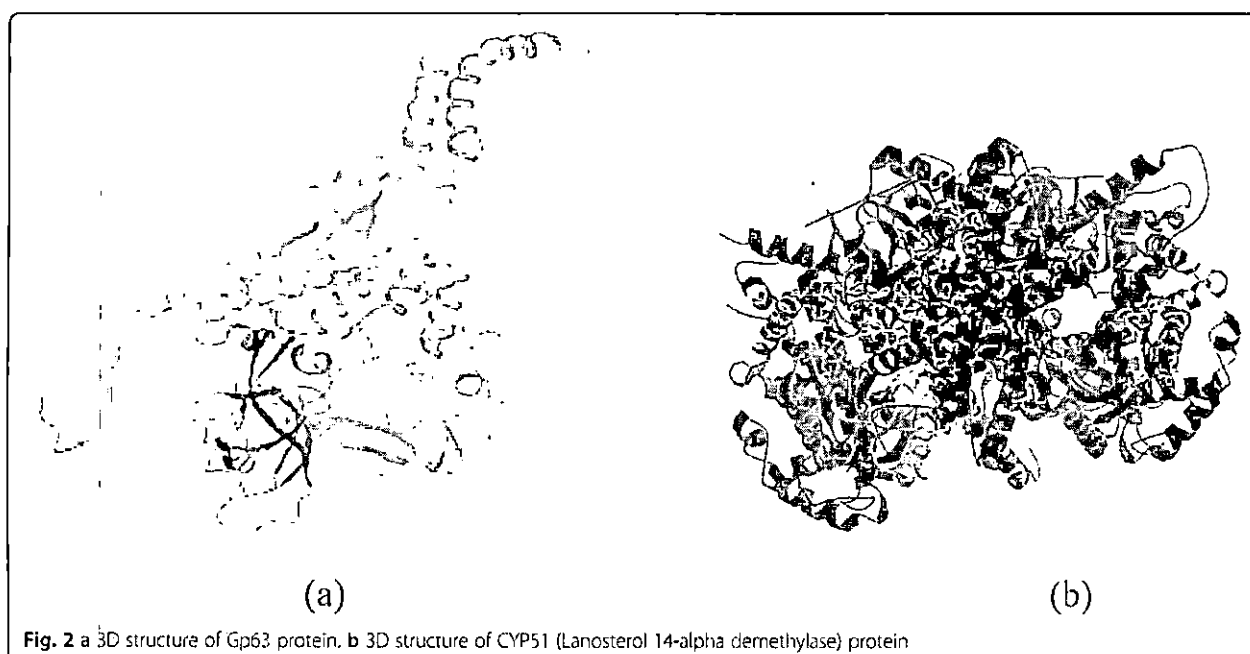

Molecular docking studies for Leishmanolysin (GP63) and Lanosterol 14- α demethylase (CYP51) with validated inhibitors and bioactive compounds of obtained from similarity indexing studies were carried out using extra precision glide docking (Glide XP) [15]. The 3D structures of compounds downloaded from PubChem and UNPD database were imported to Maestro Interface of Schrödinger and LigPrep [16] was used to understand ligand-protein interaction. Molecular docking studies were performed for the downloaded compounds. The prepared ligands were docked against protein GP63 and CYP51 (PDB ID: 3L4D) using Glide (grid-based ligand docking) program incorporated in the Schrodinger molecular modeling package by Maestro 11.0 [17]. GP63 and CYP51 are important in therapeutic impact of

Leishmaniasis treatment. Benzyloxycarbonyl-Tyr-Leu-NHOH is a highly potent inhibitor that has been validated to inhibit the activity of GP63 thereby helping in therapeutic action in treatment of cancer. The crystal structure of GP63 was modeled using raptorX server using sequence downloaded from Uniprot and the structure of CYP51 was obtained from RCSB Protein Data Bank having X-ray diffraction resolution of 2.75 Å.

The 3D structures of the ligand for docking were downloaded in sdf format from PubChem and UNPD. The protein crystal structures were further optimized and minimized using protein preparation wizard using default settings for rectifying PDB structure for docking process. The ligands were optimized using the LigPrep which generate low energy 3D structure using the OPLS-2005 force field. Thereafter, molecular docking was performed with extra precision glide docking (Glide XP) to evaluate the binding affinity of these ligands towards the protein.

Molecular dynamics (MD)

MD simulations for protein-compound complex were conducted using Desmond's explicit solvent MD package [18] with built-in, optimized fluid simulation potential (OPLS 2005) force field. Protein Preparation Wizard (macro models), LigPrep (chemical molecules), and Epik (ligand protonation states) ensured the correctness of the chemical structures provided to Desmond. Further protein was subjected to restrained minimization for hydrogen atoms only by converging heavy atoms to RMSD value of 0.30 Å [19–21]. The system was set up for simulation using a predefined water model (simple

153

point charge, SPC) as a solvent in a cubic box with periodic boundary conditions specifying box shape and size as $10 \text{ \AA} \times 10 \text{ \AA} \times 10 \text{ \AA}$. Using the system-built option, the desirable electrically neutral simulation system was built in 10 \AA buffer with 0.15 M NaCl (physiological concentration of monovalent ions). The system's relaxation was accomplished through the hybrid implementation of Steepest Descent and Broyden-Fletcher-Goldfarb-Shanno limited-memory algorithms [22]. Molecular dynamics for the system developed was carried out for 10 ns and the condition for the system was set at temperature 310 K with thermostat model and pressure of 1.01325 bar with ensemble class of NPT and energy of 1.2 at 100 ps recording interval.

Results

Similarity indexing

The results from similarity indexing were obtained in terms of similarity coefficient and based on the similarity coefficient values, and 4 compounds from natural compound databases were selected having similarity more than 70%, i.e., similarity coefficient more than 0.7 (Table 1). The source of natural compounds was identified to be from bacteria, fungi, and

plant family based on the literature, and the 2D structures of the compounds are given in figures (Fig. 4a-d).

Molecular docking results

Molecular docking of inhibitor and bioactive compounds obtained from similarity indexing method was carried out using GLIDE tool in Schrodinger interface. The results from the docking study are represented by a score called docking score/glide score [27] which denotes the binding affinity. The lower the value the better the binding affinity of the compound with the target. In this study, the docking score of UNPD86509 from *Streptomyces griseus* showed better results in comparison with inhibitor 46173719 (Table 2 and Figs. 5 and 6).

The interaction of compounds with the target GP63 can be seen in Fig. 5. Benzyloxycarbonyl-Tyr-Leu-NHOH (46173719) showed hydrogen bonding with target at ALA-43 and THR-34 position, and UNPD86509 showed hydrogen bonding with target at THR-34.

The interaction of compounds with the target CYP51 can be seen in Fig. 6. Benzyloxycarbonyl-Tyr-Leu-NHOH (46173719) showed hydrogen bonding with target at TYR-115 and LYS-421 position, and UNPD86509

Table 1 Result of similarity indexing in comparison with an inhibitor against UNPD natural compound database with their sources

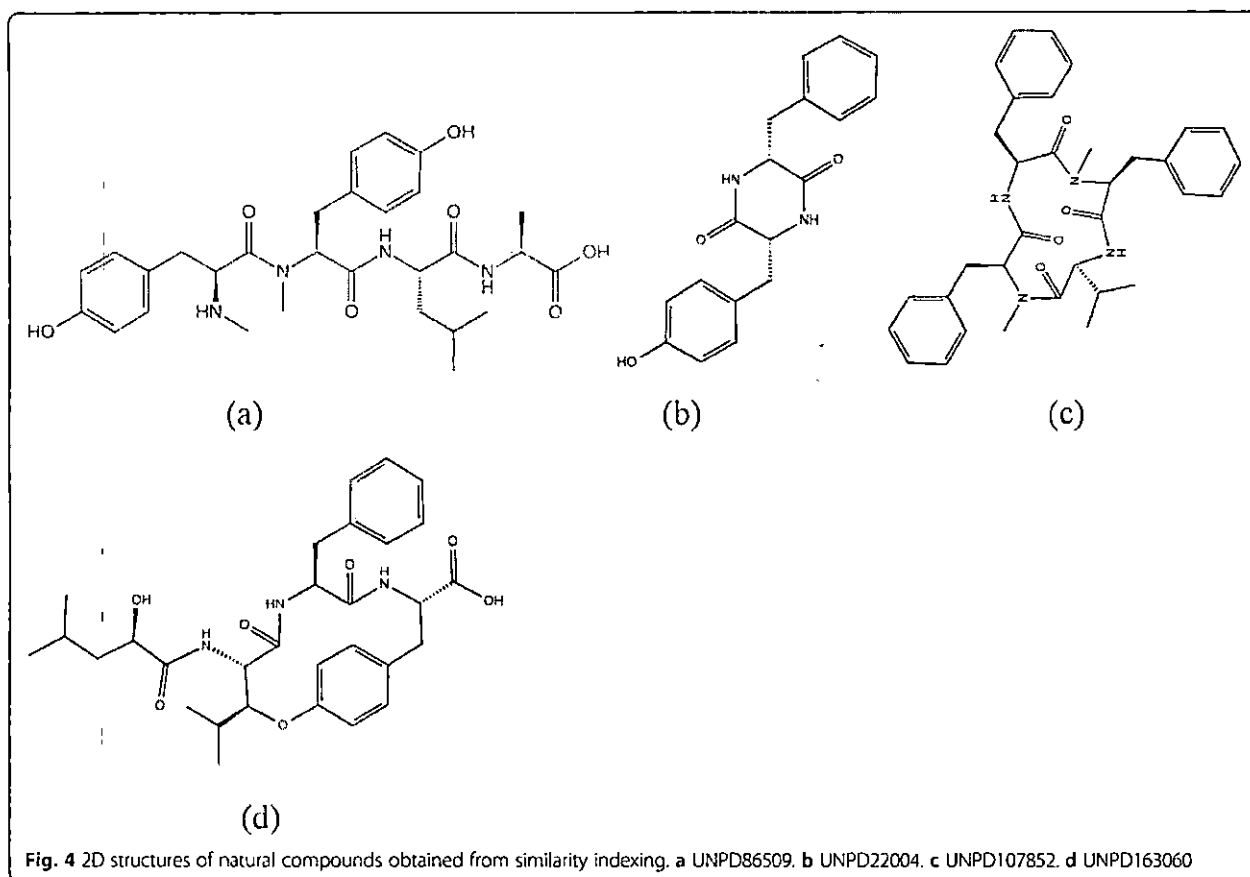

Id	Name	Similarity coefficient	Source
UNPD86509	N-methyltyrosyl-N-methyltyrosyl-leucyl-alanine	0.79	<i>Streptomyces griseus</i> [23]
UNPD107852	Hirsutide	0.78	<i>Hirsutella</i> sp [24]
UNPD22004	Cyclo-(Phe-Tyr)	0.75	Fungal species [25]

showed hydrogen bonding with target at TYR-102, TYR-115, MET-459, and ALA-206.

Molecular dynamics and simulations

The molecular dynamics for the GP63-UNPD86509 complex and CYP51-UNPD86509 complex carried out using Desmond showed a very stable configuration, and the complex showed a degree of affinity in terms of hydrogen bonding throughout the simulation time.

Table 2 Docking scores for validated inhibitor and natural compounds with CYP51 and GP63 target proteins

Compound name	Compound id	Docking score for CYP51	Docking score for GP63
Benzoyloxycarbonyl-Tyr-Leu-NHOH	46173719	- 10.087	- 8.509
N-methyltyrosyl-N-methyltyrosyl-leucyl-alanine	UNPD86509	- 11.657	- 7.834
Hirsutide	UNPD107852	- 11.203	- 6.325
Vignatic acid A	UNPD163060	- 9.809	- 5.932
Cyclo-(Phe-Tyr)	UNPD22004	- 4.542	- 6.402

Simulation of GP63-UNPD86509 (natural compound) complex

The simulation showed very stable RMSD for both c-alpha (Protein RMSD Å) and Lig-fit (Ligand RMSD Å). The protein RMSD stayed in the range of 9.5–1.1 Å and the ligand RMSD stayed in the range of 7.5–10 Å. The protein ligand contacts showed a high degree of affinity with ALA-35 and ILE-39 by holding hydrogen bonding for most duration of 10 ns (Fig. 7).

The orientation of ligand in the binding site of GP63 protein (Fig. 8a) and alignment of ligand molecules based on their states at the beginning of the simulation and after simulation are shown in Fig. 8b. Alignment of the ligand UNPD86509 with pre- and post-simulation states showed that 36% of the change in orientation of movable bonds and this orientation was calculated using Discovery Studio Visualizer 2019 academic free version [28].

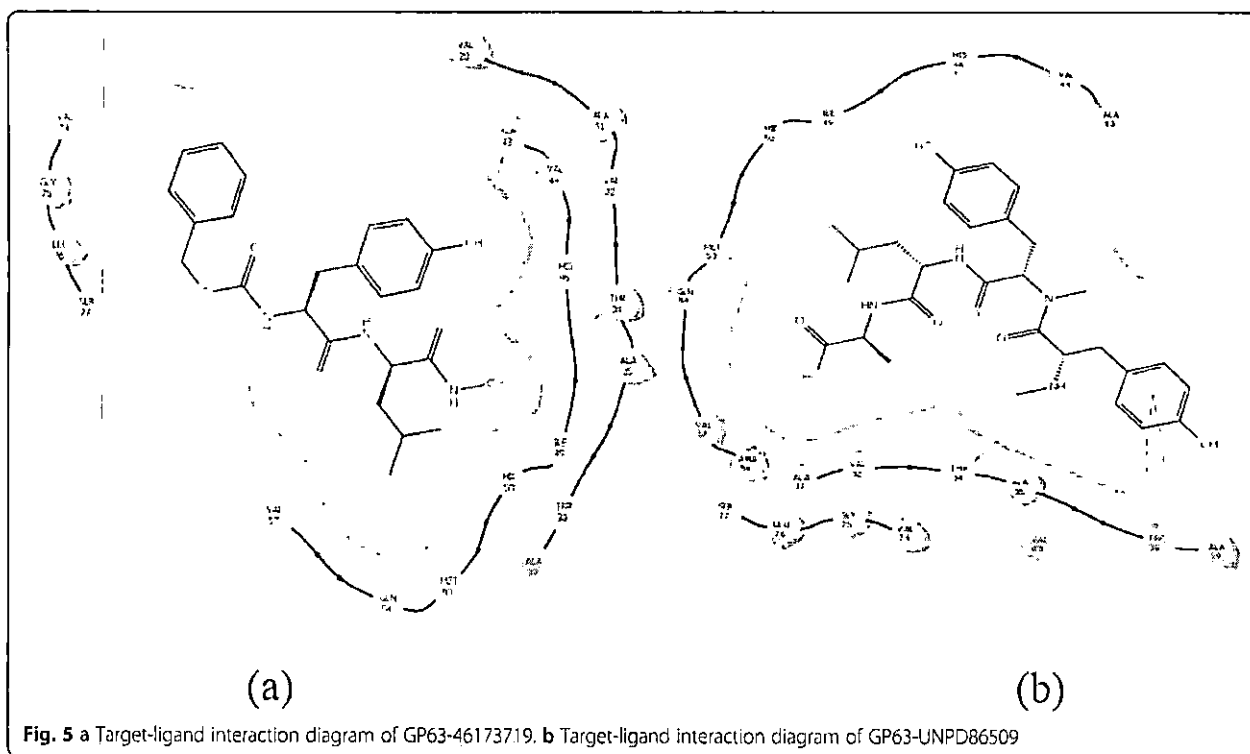

Simulation of CYP51-UNPD86509 (natural compound) complex

The simulation showed very stable RMSD for both c-alpha (Protein RMSD Å) and Lig-fit (Ligand RMSD Å). The protein RMSD stayed in the range of 2.1–2.8 Å and the ligand RMSD stayed in the range of 1.8–2.4 Å. The protein ligand contacts showed high degree of affinity

155

with TYR-102, TYR-115, MET-359, and MET-459 by holding hydrogen bonding for complete duration of 10 ns (Fig. 9).

The orientation of ligand in binding site of CYP51 protein (Fig. 10a) and alignment of ligand molecules based on their states at the beginning of simulation

and after simulation are shown in Fig. 10b. Alignment of the ligand UNP86509 with pre- and post-simulation states showed that 38% of the change in orientation of movable bonds and this orientation was calculated using Discovery Studio Visualizer 2019 academic free version [28].

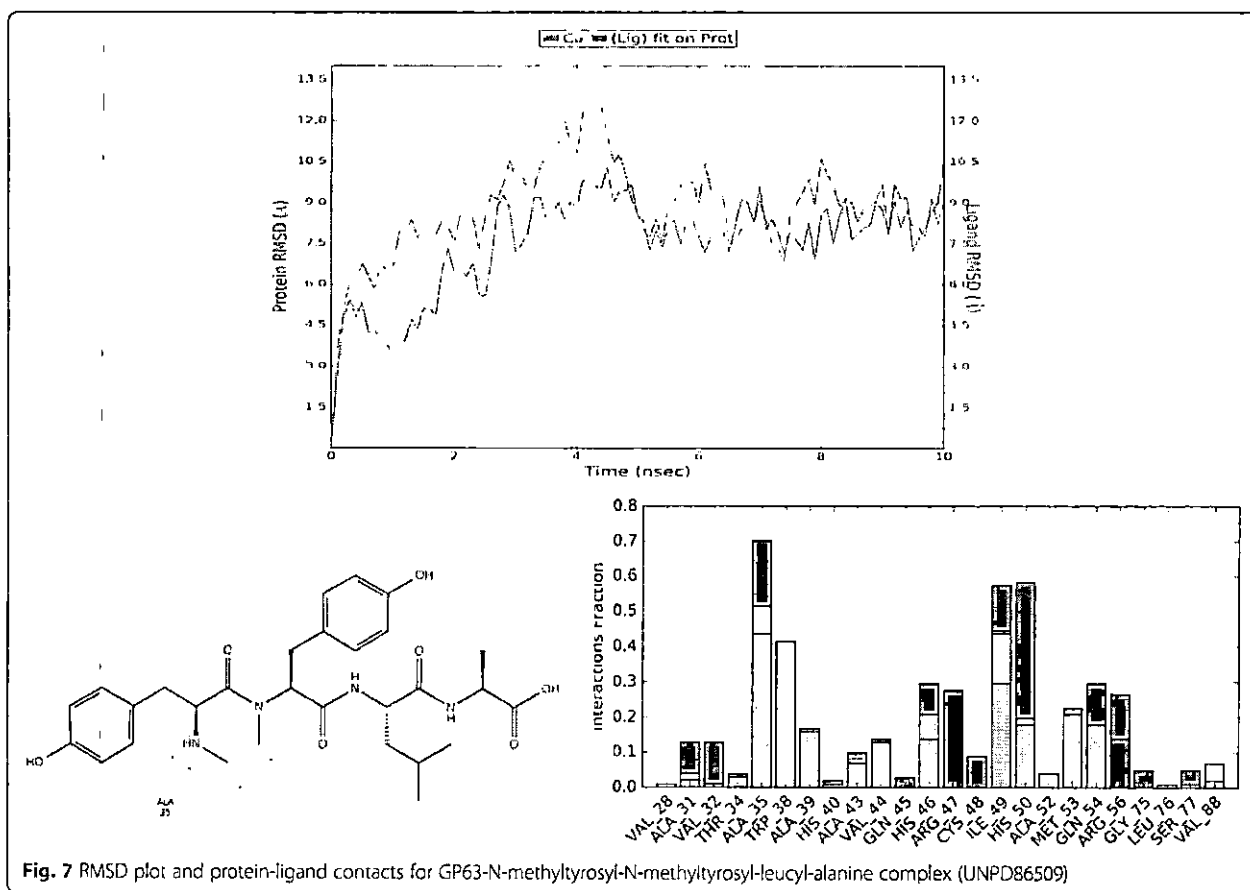

Fig. 7 RMSD plot and protein-ligand contacts for GP63-N-methyltyrosyl-N-methyltyrosyl-leucyl-alanine complex (UNPD86509)

Discussion

GP63 and CYP51 proteins from *Leishmania major* are very important in the growth of the organism, and these targets have been used as one of the major therapeutic targets in the treatment of *Leishmaniasis*. Many

compounds have been used to inhibit these targets but have failed to provide the needed impact in controlling the disease. Natural compounds have always been the source of drugs from a long time, and it is very important that we consider these natural compounds as very

important source. Similarity indexing method provides fingerprint-based values to consider compounds having similarity with already established inhibitors. The detailed study of the compounds obtained from similarity indexing can help in finding a potential long-term cure for the Leishmaniasis. In silico analysis conducted in this study should serve as the basis for further wet lab validation of inhibition of GP63 and CYP51.

Conclusion

Natural compounds from different sources are always known to have answers to drug-like compounds; many compounds have been known to have anti-Leishmaniasis properties. Similarity indexing has given some of the compounds that can be drug-like molecules. The in silico study conducted here gives natural compounds based on fingerprints and further compares the in silico interaction of GP63 and CYP51 with a validated inhibitor and the bioactive natural compounds obtained from similarity indexing. The study showed very promising results in comparison of docking score for inhibitor benzyloxycarbonyl-Tyr-Leu-NHOH (46173719) with bioactive compound UNPD86509 from *Streptomyces griseus*. The docking score of interaction for CYP51 with 46173719 showed - 10.08 and docking score of CYP51 with UNPD86509 showed - 11.65. The binding energy of interaction for GP63 with 46173719 showed - 8.5 and docking score of GP63 with UNPD86509 showed - 7.8. Molecular dynamics studies also showed very stable configuration for CYP51-UNPD86509 and GP63-UNPD86509 complex in comparison with the inhibitor complex. From this study, we can conclude that the bioactive compounds obtained from similarity index can be a potential inhibitor for the CYP51 and GP63 proteins in *Leishmania major* which has great therapeutic role in the treatment of Leishmaniasis. The findings in this study should also encourage in vitro and in vivo studies evaluations of the same with the identified natural compounds.

I. Purpose and Scope.

The purpose of this Memorandum of Understanding (MoU) is to clearly identify the roles and responsibilities of each party as they relate to providing exposure of the students in BHMS Course and MD(Hom) courses in the clinical field and to understand the depth of operative surgery and operative Gynecology and Obstetrics as well as management in clinical illness.

Both Party A and Party B should ensure that educational activities are conducted in compliance with all requirements for provision of clinical exposure to the Homoeopathic Medical Students as per curriculum of BHMS and MD(Hom) and requirement laid down by the Central Council of Homoeopathy (minimum standards requirement of Homoeopathic Colleges and attached Hospitals) regulations 2013.

II. MoU Term

The term of this MoU Agreement is the period within which the project responsibilities of this agreement shall be performed. The terms commence from 10.03.2017.

III. Party B Responsibilities

Party B shall undertake the following activities during the duration of the MoU term

1. Ensure adherence of party A to at least 2 hours per day clinical classes for batch wise students and six hours in two shifts per day for batch wise internees will be allowed by the Party B for clinical teaching and training as laid down in regulation.

2. Review and approve all documentation evidencing Party A's performance of services per regulations and monitor Party B's compliance with the MoU.

3. Provide training and technical assistances to Party A by providing exposure of the students in BHMS Course and MD (Hom) courses in the clinical field and to understand the depth of operative surgery and operative Gynecology and Obstetrics.

4. Not more than three months should be allowed in any department for internees rotation period may be cut short as per requirement of Hospital authorities subject to prior approval writing from party A.

5. Party B will not create any restriction with regard to teaching and training programme. Teaching and training programme will be in accordance with curriculum as laid down by the Central Council of Homoeopathy.

6. Party B. will not be responsible for transportation of students .

7. Party B has the right to take action against any students for committing/breach of any discipline and decorum of Party B with information and consultation of Party A of his /her guilt.

8. Ensure that Party A's Scope of work activities do not suffer for ensuring provision of curriculum requirement under the regulation.

IV Party A Responsibilities

Party A shall undertake the following activities during the duration of the MoU term.

1. Teaching and Training should be guided by the teaching staff of Party A.

2. Party A will ensure presence of Students / Internees as per the programme drawn under mutual understanding of both the party.

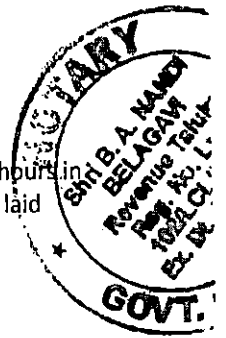

3. Party A will be responsible for transportation of the students /internee from respective college premises to the Party B premises.

No of corrections

4. Party A will ensure to replace or make good of any damages made to Party B by the students /Internee done during the period of teaching and training:
5. Party A will ensure that all student/Internee attending the teaching and training at Party B Hospital are under the guidance and supervision of In charge teaching faculty deputed by Party A.
6. Party A will ensure that Student /Internee attending the teaching and training programme at Super Specialty Hospital of Party B to, assist in the clinical and related activities of Party B.
7. Party A will follow all relevant laws and regulations regarding documentation , reporting use etc. in accordance with the provision of Hospital as well as regulations of the Central Council of Homoeopathy.

V. Parties A and B Agree to the Following Provision :

1.Documentation Approval and Acknowledgements .

All the activities of teaching and training will be suitably documented for record.

2.Special Terms and Conditions.

Party A and Party B shall follow all relevant and applicable regulations as specified in their respective area of application.

VI. Funding

1. Party A will ensure that all expenses related to students/internee teaching and training are borne and managed and themselves and will not create any liability of Party B.
2. Party B shall only provide time and pace for teaching and training programme for students/internee and will not charge for the services rendered by them.

VII. Modification and Termination.

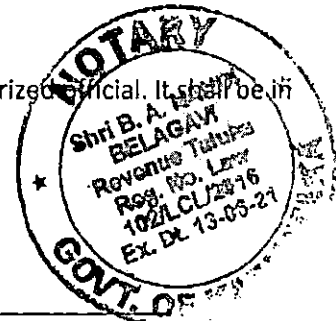

1. This agreement may be cancelled or terminated without cause by either party by giving (30) calendar days advance written notice to the other party. Such notification shall state the effective date of termination or cancellation and include any final performance and/or payment invoicing instructions/requirements.
2. Any and all amendments must be made in writing and must be agreed to and executed by the parties before becoming effective.

VIII. Effective Date and Signature.

This MoU shall be effective upon the signature of Party A and Party B authorized official. It shall be in force from **10/03/2017 till 10/03/2022**

Indicate agreement with this MoU by their signatures.

Sub: Regarding the permission to visit your Esteemed Research Centre

Respected Sir

As B.Sc. VI Semester students of Life Sciences need exposure to the recent developments in research and working mechanism of advanced equipments, we would like to visit your esteemed Institute, so kindly permit our staff and 125 students for the same as per your convenience preferably in three batches (Either on Monday/Wednesday/Friday or on Tuesday/Thursday/Saturday).

A kind request to you to make arrangements for the demonstration of Agarose gel Electrophoresis and explanation of the equipments like Laminar Air flow, PCR, UV Spectrophotometer, Colorimeter, Centrifuge, etc.

Hope you will consider and do the needful

Thanking you sir,

Date: 28th Jan. 2020
